Ever stared at a lengthy Word document – maybe a report, a thesis, or even a hefty ebook – and felt a pang of dread at the thought of manually creating an index of its contents? We've all been there! The good news? Microsoft Word offers a super-efficient, automated way to generate a professional-looking **table of contents (TOC)**. No more tedious counting of pages or trying to remember where each chapter started. In this comprehensive guide, we'll walk you through exactly **how to make a table of contents in Word**, ensuring your documents are reader-friendly and impeccably organized.

Why a Table of Contents is Your Document's Best Friend

Before we dive into the "how," let's quickly touch on the "why." A well-structured TOC is more than just a list of chapter titles and page numbers. It's an essential navigation tool that:

1. **Improves Readability:** Readers can quickly scan the TOC to find the sections they're most interested in, saving them time and frustration.
2. **Enhances Professionalism:** A consistent and accurate TOC signals attention to detail and a polished document.
3. **Facilitates Navigation:** Especially for long documents, a TOC acts as a roadmap, guiding users through your content.
4. **Aids Revision:** When you need to make changes, a dynamic TOC can be easily updated, reflecting those adjustments.

automatically.

Think of it as the librarian for your book. It tells everyone exactly where to find what they're looking for. So, let's get started on building this indispensable feature!

The Foundation: Using Heading Styles

The secret sauce to automatically generating a table of contents in Word lies in its ability to recognize **heading styles**. Word uses these styles (Heading 1, Heading 2, Heading 3, and so on) to understand the hierarchical structure of your document. If you don't use heading styles, Word won't know what to include in your TOC.

What are Heading Styles?

Heading styles are pre-defined formatting sets within Word that you can apply to your text. They're not just about making your chapter titles bigger or bolder; they're about assigning a semantic role to that text. You can find them in the **Home** tab, within the **Styles** group.

How to Apply Heading Styles

1. **Select the Text:** Highlight the text you want to designate as a heading (e.g., your chapter title, a major section heading).
2. **Choose a Style:** In the **Styles** gallery on the **Home** tab, click on the desired heading style. For top-level chapters, you'll typically use **Heading 1**. For subheadings within a chapter, you'd use **Heading 2**, and for sub-subheadings, **Heading 3**, and so on.
3. **Repeat for All Headings:** Go through your entire document and apply the appropriate heading style to all titles and subtitles you want to appear in your table of contents.

Customizing Heading Styles (Optional but Recommended)

While Word's default heading styles are functional, they might not match your document's overall design. You can easily customize them to fit your aesthetic.

1. **Right-Click:** Right-click on the heading style you want to modify (e.g., Heading 1) in the Styles gallery.
2. **Select "Modify...":** This will open the Modify Style dialog box.
3. **Adjust Formatting:** Here, you can change the font, size, color, paragraph spacing, and more. Make sure your changes are consistent with your document's branding or academic requirements.
4. **Apply to the document:** Ensure "New documents based on this template" is selected if you want these changes to apply to future documents, or "Only in this document" for the current one. Click **OK**.

Consistency is key! Using heading styles correctly is the absolute first step to successfully generating your TOC. If you skip this, the automated TOC function won't have the information it needs.

Generating Your Table of Contents

Once your heading styles are in place, the actual creation of the TOC is surprisingly straightforward. Word does all the heavy lifting!

Step-by-Step TOC Creation

1. **Position Your Cursor:** Click in your document where you want the table of contents to appear. This is typically at the very beginning, after your title page. You might want to insert a page break beforehand (**Insert > Pages > Page Break**) to ensure your TOC is on its own page.
2. **Navigate to the References Tab:** Click on the **References** tab in the Word ribbon.
3. **Select "Table of Contents":** In the **Table of Contents** group, click on the **Table of Contents** button.

4. **Choose a Built-in Style:** Word will present you with several pre-designed TOC styles. The most common are **Automatic Table 1** and **Automatic Table 2**. These are generally excellent starting points. Simply click on your preferred option.

And voilà! Word will instantly scan your document for all applied heading styles and create a functional table of contents, complete with chapter titles and their corresponding page numbers. It's quite magical the first time you see it!

Inserting a Custom Table of Contents

If the built-in options don't quite cut it, or you need more control, you can create a custom table of contents.

1. **Click "Table of Contents":** Again, start by clicking the **Table of Contents** button on the **References** tab.
2. **Select "Custom Table of Contents...":** This opens a dialog box with many more options.
3. **Review Options:**
 1. **Show levels:** This slider determines how many levels of headings (e.g., Heading 1, Heading 2, Heading 3) will be included in your TOC. If you only want major chapters, set it to 1 or 2. For a more detailed outline, you might go up to 3 or 4.
 2. **Show page numbers:** Usually, you'll want this checked.
 3. **Right align page numbers:** This is standard for most TOCs.
 4. **Tab leader:** This controls the dotted or dashed lines that connect your heading text to the page numbers. You can choose from none, dots, dashes, or solid lines.
 5. **Formats:** You can choose from various pre-set formatting styles for your TOC itself, independent of the heading styles you used in the document.
4. **Advanced Options (For the Detail-Oriented):** Click the **Options...** button for even finer control. Here, you can manually assign TOC levels to specific styles (useful if you used custom styles beyond the default headings). You can also specify which styles to include.
5. **Click OK:** Once you're happy with your selections, click **OK** in both the Custom Table of Contents dialog box and the Options dialog box.

This custom approach gives you immense flexibility. You might use this if you've used styles like "Chapter Title" or "Section Heading" instead of the default Word headings.

Updating Your Table of Contents

This is where the real power of an automated TOC shines. As you edit your document – adding or deleting content, rephrasing headings, or moving sections – your page numbers and headings can become outdated. Don't panic!

How to Update

1. **Right-Click Anywhere on the TOC:** Place your cursor anywhere within the generated table of contents.
2. **Select "Update Field":** A context menu will appear. Click on **Update Field**.
3. **Choose Update Method:** You'll be presented with two options:
 1. **Update page numbers only:** Use this if you've only added or deleted text that has shifted page numbers, but haven't changed any heading text.
 2. **Update entire table:** Use this if you've added new headings, deleted headings, or changed the text of existing headings. This is the most comprehensive option and generally the safest bet if you're unsure.
4. **Click OK:** Word will re-scan your document and refresh the TOC accordingly.

It's a good practice to update your TOC before finalizing or printing your document. Regularly updating ensures accuracy and saves you from embarrassing mistakes.

Troubleshooting Common TOC Issues

Even with automated tools, sometimes things don't go as planned. Here are a few common hiccups and how to fix them:

Issue: My TOC isn't showing certain headings.

Solution: The most likely culprit is that the heading wasn't formatted with a Word heading style (Heading 1, Heading 2, etc.). Go back through your document and ensure all desired headings are styled correctly. If you used custom styles, make sure they are included in the TOC options (see "Inserting a Custom Table of Contents").

Issue: The page numbers are wrong.

Solution: This usually means the TOC needs to be updated. Right-click on the TOC and select "Update Field," then choose "Update entire table" to be safe.

Issue: My TOC looks too simple/too complex.

Solution: Adjust the "Show levels" option in the Custom Table of Contents dialog box. You can also explore different "Formats" to change the overall appearance.

Issue: I accidentally clicked "Remove Table of Contents." How do I get it back?

Solution: If you haven't made too many other changes, you can often use **Ctrl + Z** (Undo) to bring it back. If not, you'll need to regenerate it using the steps outlined earlier. Don't worry, your heading styles are still in the document!

Issue: My TOC is showing styles I *don't* want (e.g., the document title).

Solution: You might have accidentally applied a heading style to text that shouldn't be in the TOC. Either reformat that text with a normal style or go into the Custom Table of Contents options and remove the unwanted style from the TOC inclusion list.

Advanced TOC Features and Customization

For those who want to go the extra mile, Word offers more advanced TOC customization:

Creating Your Own TOC Styles

Beyond the built-in TOC formats, you can define your own formatting for the TOC entries. When you're in the Custom Table of Contents dialog box, click the "Modify..." button next to the "Formats" dropdown. This allows you to format the TOC Level 1, TOC Level 2, etc., styles independently of your document's heading styles. This is great for controlling indentation, font, and spacing of the TOC itself.

Using the TOC as a Navigation Pane Link

When you hover over an entry in your generated TOC and hold down the **Ctrl** key, you'll see a tooltip prompting you to click to follow the link. Clicking will take you directly to that section in your document. This is incredibly useful for navigation, especially in digital documents.

Linking to Other Documents

While not a standard feature for a single document TOC, you can create hyperlinks within a TOC to other Word documents or web pages. This is more advanced and typically involves using the "Hyperlink" function directly on the TOC text after it's generated.

Best Practices for a Stellar Table of Contents

To ensure your TOC is not just functional but truly excellent, keep these best practices in mind:

1. **Be Consistent with Heading Styles:** This is paramount. Stick to a logical hierarchy (Heading 1 for chapters, Heading 2 for main sections, etc.).
2. **Keep Heading Titles Concise and Clear:** Long, rambling heading titles can make your TOC cluttered and hard to read.
3. **Use a Readable Font and Size:** Ensure the TOC is easy on the eyes. Avoid overly decorative fonts.
4. **Maintain Adequate Spacing:** Proper line spacing and paragraph spacing make the TOC less dense.
5. **Proofread Your TOC:** After updating, always do a quick scan to ensure everything looks right.
6. **Consider Your Audience:** For formal reports or academic papers, a multi-level TOC is expected. For simpler documents, a few levels might suffice.

Conclusion: Master Your Document's Structure

Learning **how to make a table of contents in Word** is a fundamental skill for anyone who creates documents. It transforms a potentially unwieldy collection of text into a navigable, professional, and user-friendly resource. By understanding the importance of heading styles and leveraging Word's automated features, you can save yourself a significant amount of time and effort while elevating the quality of your work.

So, the next time you're faced with a lengthy document, remember these steps. Apply your heading styles diligently, generate your TOC with confidence, and update it regularly. Your readers (and your future self!) will thank you for it.

Creating a Table of Contents in Microsoft Word is a foundational skill for producing well-structured, reader-friendly documents—whether it's a lengthy report, a thesis, a technical manual, or a comprehensive guide. A thoughtfully designed table of contents not only enhances navigation but also reflects professionalism and clarity, making it an essential tool for both academic and professional writing. Understanding how to create and maintain this critical navigational element in Word empowers writers to present their content with precision and ease.

What Is a Table of Contents and Why It Matters A Table of Contents serves as a roadmap for readers, listing main headings, subheadings, and page numbers in a hierarchical format that mirrors the document's structure. This organized layout allows users to quickly locate information, reduce reading time, and improve comprehension—especially in long-form content like research papers, eBooks, or corporate proposals. Beyond usability, a polished table of contents signals attention to detail and adherence to standard formatting, elevating the perceived credibility of the work.

Step-by-Step Guide to Creating a Table of Contents in Word To build an effective table of contents, start by applying heading styles consistently throughout your document. Word's built-in Heading 1 through Heading 9 styles—such as Heading 1 for main sections and Heading 2 for subsections—automatically format text and embed metadata that Word recognizes. Once your headings are styled correctly, navigate to the Insert tab and select Table of Contents. From there, choose a pre-designed layout that matches your document's tone and structure—options range from simple numbered lists to sophisticated designs with indentation and varying fonts. Word dynamically updates the table whenever you edit headings or rearrange content, ensuring accuracy without manual adjustments.

Customization and Best Practices While Word offers default templates, customize your table to reflect branding or document-specific needs. Adjust numbering formats—such as using letters, roman numerals, or custom symbols—to align with industry standards or personal preference. You can also modify font, size, and alignment to ensure visual harmony with the rest of the document. For multi-part documents like book chapters or extensive manuals, consider creating separate TOCs for each section or including a master index with cross-references. Always review the table after major revisions to maintain consistency and accuracy.

Practical Applications Across Contexts The utility of a well-crafted table of contents extends across disciplines. In academic writing, it helps readers track complex arguments and locate key findings

efficiently. In business, it streamlines internal reports and proposals, enabling stakeholders to grasp core messages swiftly. Technical writers rely on TOCs to guide users through software manuals or user guides, enhancing usability and reducing support inquiries. Even in creative writing, such as novels or anthologies, a structured TOC aids readers in navigating chapters and themes seamlessly.

Benefits Beyond Navigation Beyond improving readability, a thoughtfully designed table of contents contributes to the overall professionalism of a document. It reflects a writer's organizational discipline and respect for the reader's experience. Dynamic linking ensures that page updates propagate automatically, saving time during editing. Furthermore, search engines and digital platforms can better index structured content, boosting discoverability in online environments—an increasingly important factor in today's digital landscape.

The Future of Table of Contents in Word and Digital Publishing As document creation evolves with AI and collaborative tools, the role of the table of contents continues to adapt. Emerging features in Word now support interactive and dynamic TOCs that respond in real time to content changes, even in cloud-based environments shared across teams. Voice navigation and accessibility enhancements further expand usability, ensuring that well-structured documents remain intuitive for all users. In an era of information overload, the table of contents remains a cornerstone of clarity, anchoring readers in an increasingly complex world of digital content.

How to Make a Table of Contents in Word: A Comprehensive Guide

A well-structured document is crucial for readability and professionalism, especially for lengthy reports, academic papers, or lengthy business proposals. One of the most effective tools for achieving this is a Table of Contents (TOC). A TOC acts as a roadmap, allowing readers to quickly navigate through your document and find the information they need. Microsoft Word offers powerful, automated features to create and manage your TOC, saving you significant time and effort compared to manual creation.

This in-depth guide will walk you through every step of creating a dynamic and professional Table of Contents in Word. We'll cover everything from understanding the prerequisites to advanced customization options, ensuring you can create a TOC that perfectly suits your document's needs. Whether you're a student, a researcher, or a business professional, mastering this skill will undoubtedly enhance your document creation process.

The Foundation: Understanding Word's Automatic Table of Contents

Before diving into the "how-to," it's essential to grasp the underlying principle of Word's automatic TOC generation. Word relies on styles to build your Table of Contents. Specifically, it looks for text formatted with heading styles (Heading 1, Heading 2, Heading 3, etc.). The text within these styled paragraphs becomes an entry in your TOC, and the page number where that

heading appears is automatically linked.

This reliance on styles is what makes the automatic TOC so powerful. When you update your document – adding or removing content, or moving sections around – the page numbers in your TOC automatically adjust when you refresh it. This eliminates the tedious and error-prone task of manually renumbering every entry.

Why Use an Automatic Table of Contents?

- 1. Efficiency: Saves immense time compared to manual creation.**
- 2. Accuracy: Eliminates human error in page numbering.**
- 3. Professionalism: Enhances the appearance and organization of your document.**
- 4. Navigability: Improves the user experience for your readers.**
- 5. Dynamic Updates: Automatically reflects changes in your document.**

Step 1: Applying Heading Styles - The Crucial First Step

This is arguably the most critical step in creating a functional automatic TOC. If you don't apply heading styles, Word won't know what to include in your Table of Contents. This process is straightforward but requires consistent application throughout your document.

Identifying Your Document Structure

Before you start applying styles, take a moment to plan the hierarchy of your document. What are your main sections? What are the sub-sections within those? This planning will help you choose the appropriate heading levels.

Applying Heading Styles in Word

- 1. Select the text you want to designate as a heading.**
- 2. Go to the Home tab in Word's ribbon.**
- 3. In the Styles group, you'll see a gallery of pre-defined styles.**
Click on the appropriate heading style. For main section titles, use Heading 1. For sub-sections, use Heading 2, and for further sub-sections, use Heading 3, and so on.
- 4. Repeat this process for every heading you want to appear in your Table of Contents.**

Tips for Effective Style Application:

- 1. Consistency is Key: Use the same style for similar levels of headings throughout your document.**
- 2. Don't Be Afraid of Hierarchy: Use multiple heading levels (e.g., Heading 1, Heading 2, Heading 3) to create a clear and logical structure.**
- 3. Consider Default Styles: Word's default heading styles are a good starting point, but you can modify them to match your document's design. (More on this later).**
- 4. Check for Unstyled Text: Ensure that all your section titles and sub-titles are actually styled. Simply making text bold or larger does not make it a heading for the TOC.**

Customizing Heading Styles (Optional but Recommended)

While Word's default heading styles are functional, they might not align with your document's aesthetic. Fortunately, you can easily modify them.

- 1. Apply a heading style to a piece of text.**

2. Format that text (font, size, color, alignment, spacing) exactly how you want your headings to appear.
3. With the styled text still selected, right-click on the style in the Styles gallery on the Home tab.
4. Select "Update [Style Name] to Match Selection."
5. This change will now apply to all instances of that heading style in your document.

Step 2: Inserting Your Table of Contents

Once your document is properly styled, inserting the TOC is a quick and automated process.

Choosing the TOC Location

Typically, the Table of Contents is placed at the beginning of a document, after the title page and any other preliminary matter (like an abstract or acknowledgments). Ensure you have a blank page or a suitable location ready.

Inserting the Automatic TOC

1. Place your cursor at the location where you want your Table of Contents to appear.
2. Navigate to the References tab in the Word ribbon.
3. In the Table of Contents group, click on the Table of Contents button.
4. A dropdown menu will appear with several Automatic Table options (e.g., "Automatic Table 1," "Automatic Table 2"). These differ slightly in their pre-defined formatting.
5. Select an automatic table. Word will automatically generate the TOC based on your applied heading styles.

Understanding Automatic Table Options

The "Automatic Table" options are pre-formatted templates. They typically display your Heading 1 entries, followed by indented Heading 2 entries, and then Heading 3 entries, all with their corresponding page numbers.

Step 3: Updating Your Table of Contents

This is where the magic of an automatic TOC truly shines. As you edit your document, your TOC will become outdated. You need to refresh it to reflect the latest changes.

When to Update Your TOC

You should update your TOC:

- 1. After you have added or deleted significant content.**
- 2. If you have moved entire sections of your document.**
- 3. If you have changed the text of any of your headings.**
- 4. If your page numbering has changed.**

How to Update Your TOC

There are two primary ways to update your Table of Contents:

1. Right-Click Method:

- 1. Click anywhere within your Table of Contents to select it.**
- 2. Right-click on the TOC.**
- 3. Select "Update Field" from the context menu.**
- 4. A dialog box will appear: "Update Table of Contents." Choose either:**
 - 1. "Update page numbers only" (if you've only changed page breaks or added/removed content without altering heading**

text).

2. "Update entire table" (if you've added, removed, or changed heading text, or if you want to be absolutely sure everything is updated).

5. Click OK.

2. References Tab Method:

1. Click anywhere within your Table of Contents.
2. Go to the References tab.
3. In the Table of Contents group, click the Update Table button.
4. This will bring up the same "Update Table of Contents" dialog box as the right-click method. Choose your update option and click OK.

Important Note on Updating

When you choose "Update entire table," Word will re-scan your document for all styled headings and rebuild the TOC from scratch. This is the safest option if you've made multiple changes.

Step 4: Customizing Your Table of Contents

While the automatic tables are convenient, you'll often want to tailor your TOC to be more specific to your document's requirements or your personal style preferences. Word provides extensive customization options.

Accessing Customization Options

1. Insert an Automatic Table first (as described in Step 2).
2. With the TOC selected, go to the References tab.
3. Click Table of Contents.
4. Select "Custom Table of Contents..." from the dropdown menu.

Key Customization Options in the Dialog Box

The "Table of Contents" dialog box offers several tabs and options:

1. Table of Contents Tab:

- 1. Show levels:** This is a crucial setting. It determines how many levels of headings (Heading 1, Heading 2, etc.) will be included in your TOC. For example, setting this to "3" will display Heading 1, Heading 2, and Heading 3 entries.
- 2. Show page numbers:** Unchecking this will remove page numbers from your TOC.
- 3. Right align page numbers:** Ensures page numbers are aligned to the right margin.
- 4. Tab leader:** This controls the characters (dots, dashes, or none) that appear between the heading text and the page number. You can select from various pre-defined leaders or choose "None."
- 5. Formats:** This dropdown offers pre-defined TOC styles that change the overall look and feel of your TOC. Options include "From Template," "Classic," "Distinctive," "Fancy," etc.
- 6. Preview:** This area shows you a live preview of how your TOC will look based on your selected options.

2. Options Button:

Clicking the "Options..." button reveals more granular control:

- 1. "Available styles:"** This lists all the styles in your document.
- 2. "TOC level:"** For each available style, you can assign a TOC level. For example, you'd assign "1" to Heading 1, "2" to

Heading 2, etc. This is how you tell Word which styles constitute your TOC hierarchy.

- 3. "Outline level:" This is another way to control hierarchy, often used in conjunction with the TOC level.**
- 4. Important: Make sure to clear the TOC level for any styles you *don't* want in your TOC (e.g., Body Text, Normal).**

3. Edit Button:

The "Edit..." button allows you to modify the actual styles used for each TOC level (e.g., TOC 1, TOC 2). This is where you can change the font, size, color, and indentation of your TOC entries.

- 1. Click "Edit..."**
- 2. Select the TOC level you want to modify (e.g., "TOC 1" for Heading 1 entries).**
- 3. Click "Modify..."**
- 4. This opens the standard "Style" dialog box, where you can apply any character or paragraph formatting you desire.**
- 5. Click OK in all open dialog boxes to apply your changes.**

Advanced Customization: Including Other Elements

While heading styles are the primary source for TOC entries, you can include other elements using the "Options" button:

- 1. Manual Entries: If you have text that isn't a styled heading but you want to include it in your TOC, you can manually mark it. This involves using Word's "Index and Tables" feature to cross-reference specific text or bookmarks. However, this is a more advanced technique and often less dynamic than using styles.**
- 2. Custom Styles: You can create your own custom styles (e.g.,**

"Chapter Title") and then assign them a TOC level in the "Options" dialog box.

Step 5: Managing Your Table of Contents

Beyond insertion and updating, there are a few other management tasks to be aware of.

Removing a Table of Contents

- 1. Click anywhere within your Table of Contents.**
- 2. Go to the References tab.**
- 3. Click the Table of Contents button.**
- 4. Select "Remove Table of Contents" from the bottom of the dropdown menu.**

Handling Special Characters and Long Titles

Word's TOC generator is generally good at handling these. However, if you have very long headings, they might wrap awkwardly. Consider slightly shortening headings or adjusting your custom TOC styles for better formatting. Special characters are usually handled well, but it's always good to check your TOC after updating.

TOC with Bookmarks

For more precise navigation, especially in long documents, you can insert bookmarks at key locations and then create TOC entries that link to those bookmarks. This is done via the "Options" button in the Custom Table of Contents dialog, where you can link styles to bookmarks. However, relying solely on heading styles is generally sufficient for most standard TOC

needs.

Troubleshooting Common Table of Contents Issues

Even with automated features, you might encounter a few common hiccups:

- 1. Entries Missing:** This almost always means the text wasn't formatted with a heading style that's included in your TOC levels. Double-check your style application.
- 2. Incorrect Page Numbers:** Ensure you've updated the field. If the issue persists, it might be a complex pagination problem, but typically "Update entire table" resolves this.
- 3. Unwanted Items in TOC:** This indicates a style has been accidentally applied to text that shouldn't be a heading. Either re-style the text or go to the "Options" button in the Custom TOC dialog and remove the TOC level for that style.
- 4. Formatting Problems:** If the TOC looks messy, revisit the "Edit" button in the Custom TOC dialog to adjust the "TOC 1," "TOC 2," etc., styles.

Conclusion: Elevate Your Documents with a Professional Table of Contents

Creating a Table of Contents in Word is no longer a manual chore. By understanding and utilizing Word's powerful automatic TOC features, you can significantly improve the organization, navigability, and professional appearance of your documents. The key lies in consistently applying heading styles, regularly updating your TOC, and leveraging the customization options to perfectly match your document's requirements.

Questions & Answers About how to make table of contents in word

No	Question	Answer
1	How do I create a clickable Table of Contents in Word automatically?	To create an automatic Table of Contents (TOC), first apply Heading Styles (e.g., Heading 1, Heading 2) to your document's titles and subtitles. Then, go to the 'References' tab, click 'Table of Contents,' and choose an 'Automatic Table' style. Word will generate a clickable TOC based on your applied styles.
2	What if my Table of Contents isn't updating correctly in Word?	If your TOC isn't updating, right-click anywhere within the TOC and select 'Update Field.' Choose 'Update page numbers only' if you've only added or removed text. If you've added or deleted headings, select 'Update entire table'.
3	Can I customize the appearance of my Table of Contents in Word?	Yes! After generating your automatic TOC, you can customize its appearance. Go to 'References' > 'Table of Contents' > 'Custom Table of Contents.' Here, you can change fonts, indentation, the number of heading levels shown, and more.
4	How do I manually insert a Table of Contents in Word if I don't want automatic?	For a manual TOC, you'll need to type it yourself. Place your cursor where you want the TOC, go to 'References' > 'Table of Contents' > 'Manual Table.' Word will insert a placeholder TOC. You'll then need to manually type each entry and its page number, and it won't be clickable.

5	What's the difference between an automatic and manual Table of Contents in Word?	Automatic TOCs are generated by Word based on applied Heading Styles and are automatically updated. Manual TOCs are typed entirely by you, require manual updating, and aren't clickable. Automatic is generally recommended for efficiency and accuracy.
