

Out Of Iraq A Practical Plan For Withdrawal Now

Out of Iraq: A Practical Plan for Withdrawal Now

Iraq, a land steeped in history and fraught with complex challenges, finds itself at a crucial juncture. The need for a measured and strategic withdrawal is no longer a theoretical debate; it's a practical necessity. This comprehensive guide offers a realistic plan for a phased withdrawal, addressing security concerns, humanitarian needs, and economic realities. The Imperative for Change For years, the presence of foreign forces in Iraq has been a source of political tension and social unrest. While initial intervention might have had noble intentions, the long-term presence has eroded trust and contributed to a climate ripe for conflict. Now, a thoughtful withdrawal strategy is paramount. This isn't about abandoning Iraq; it's about supporting its people to build a sustainable future independent of foreign military presence. This plan focuses on practical steps, addressing the real-world implications of such a transition. Phase 1: Security Assessment and Troop Reduction (Months 1-6) The first phase centers on a comprehensive security assessment, involving a detailed analysis of current Iraqi security forces capabilities and vulnerabilities. This isn't just about troop

numbers; it's about *capacity building*.

- **Assessment Methodology:**

A multi-faceted approach is crucial. This includes:

- **On-the-ground analysis:**

Teams of experienced military advisors, alongside Iraqi security forces, conduct thorough assessments of existing military installations and training facilities. (Image: A map of Iraq highlighting key locations for analysis.)

- **Intelligence sharing:** A transparent exchange of intelligence between Iraqi and foreign intelligence services is paramount to a coordinated and effective approach.

- **Training Evaluation:** A rigorous evaluation of Iraqi forces' training effectiveness, identifying areas needing improvement and supplementing existing skillsets. (Image: Example of training session, Iraqi soldiers receiving advanced weapons training).

- **Troop Reduction:** A phased withdrawal schedule should be implemented. Starting with smaller units, followed by larger groups, ensures gradual adaptation and minimizes disruption. (Example: Withdrawal of US military personnel from major bases, followed by a reduction in smaller outposts.)

Phase 2: Economic

Empowerment (Months 6-12) A sustainable withdrawal plan must prioritize Iraq's economic viability. This phase focuses on bolstering local economies and fostering self-reliance.

- **Investment in Infra**

Targeted investment in crucial infrastructure, like power grids, water systems, and transportation networks, is essential. This creates job opportunities and attracts domestic and foreign investment.

(Example: Funding repairs and upgrades to Baghdad's crucial water systems)

- **Economic Development Initiatives:** Partnering with Iraqi businesses and local governments to establish small and medium-sized enterprises. This provides job opportunities for Iraqi nationals and fuels economic activity. (Example: A vocational training program

focused on tech-related skills). • **Foreign Aid Restructuring:**

Shifting foreign aid from direct military spending to long-term economic projects, education initiatives, and healthcare programs.

(Image: Visual representation of the funding allocation shift from military support to economic development.) *Phase 3: Building Local Capacity & Governance (Months 12 onwards)*

Building local capacity and a stable government is crucial to ensure a smooth transition. • *Strengthening Political Institutions:* Providing support to Iraqi political institutions to encourage dialogue, cooperation, and inclusivity. (Example: Supporting the development of robust legislative bodies and a transparent justice system). • **Civic**

Engagement: Promoting civic engagement through initiatives like free and fair elections, freedom of the press, and access to information. (Image: Demonstration of a community engagement session focused on local election awareness). • **International**

Cooperation: Maintaining ongoing partnerships with international organizations to assist Iraq in various sectors, including education, healthcare, and infrastructure development. **Practical Examples of Specific Actions**

• Phased Withdrawal: Instead of a complete pullout at once, smaller groups of foreign troops withdraw from different locations, enabling Iraqi forces to gradually take the lead. •

Logistics Support: Providing advanced logistics and support systems to Iraqi forces, enabling them to maintain order and security across the country. • **Training Curriculum:** Revising training curricula for Iraqi forces, focusing on counter-terrorism tactics,

human rights training, and cultural sensitivity. **FAQ Section 1. What are the potential security risks of a rapid withdrawal?** A well-structured withdrawal plan addresses these risks by incorporating

phased reductions, enhanced security training for Iraqi forces, and ongoing intelligence sharing. 2. How will this plan address the humanitarian crisis? The plan prioritizes economic empowerment and humanitarian aid by investing in infrastructure, healthcare, and education initiatives. 3. **What safeguards are in place to ensure a smooth transition?** Phased withdrawals, intensive training, and constant security assessments ensure a smooth transition. 4. **What is the role of international cooperation in this plan?** International cooperation plays a crucial role in providing financial aid, expertise, and humanitarian support. 5. **How will the plan address potential corruption within the Iraqi government?** Transparency measures, independent auditing, and international oversight help mitigate corruption. Summary of Key Points A well-structured withdrawal plan requires: • **Phased security assessments and troop reduction.** • **Economic empowerment and infrastructure development.** • **Building local capacity and governance.** • International cooperation and humanitarian support. This plan is a practical framework for a measured and responsible withdrawal from Iraq, supporting the Iraqi people's journey towards a stable and prosperous future. It's not a perfect solution, but a pragmatic approach that balances the complexities of the situation. Continued dialogue and adaptable strategies will be crucial as the process unfolds.

Navigating the Exit: A Practical Plan for

Withdrawal from Iraq Now

The question of how and when to withdraw from Iraq has been a constant, often contentious, topic for years. It's a complex issue, laden with geopolitical implications, humanitarian concerns, and the desire for both national security and peace. While the boots on the ground have thinned considerably compared to the peak of the conflict, the ongoing presence of foreign forces and advisors, coupled with the lingering effects of decades of instability, means the conversation isn't over. This article aims to outline a *practical plan for withdrawal from Iraq now*, moving beyond rhetoric to actionable steps that prioritize a responsible and sustainable exit.

The reality on the ground in Iraq is multifaceted. We've seen significant progress in certain areas, particularly in the fight against ISIS. However, challenges remain, including political fragmentation, economic vulnerabilities, and the persistent threat of extremist ideologies. A hasty or ill-conceived withdrawal could undo hard-won gains, destabilize the region further, and have unintended consequences for global security. Conversely, an indefinite presence can breed resentment, drain resources, and perpetuate a cycle of dependency.

Therefore, a well-structured, phased approach is not just desirable, but essential. This isn't about abandoning Iraq, but about transitioning from direct intervention to a supportive, collaborative partnership that empowers Iraqi sovereignty and self-reliance. Let's explore what a practical plan for withdrawal from Iraq now might entail.

Understanding the Current Landscape: Why Now?

The impetus for considering a withdrawal plan *now* stems from several key factors. Firstly, the operational posture of international forces has evolved significantly. The focus has largely shifted from large-scale combat operations to advisory and training roles, supporting Iraqi security forces in their ongoing counter-terrorism efforts. This signifies a maturation of Iraq's own defense capabilities.

Shifting Security Dynamics

The Iraqi Security Forces (ISF), including the Iraqi Army and the Counter-Terrorism Service (CTS), have demonstrated considerable resilience and capability in recent years. They have taken on greater responsibility for territorial security and combating remaining ISIS cells. While challenges persist, particularly in intelligence gathering and advanced logistics, the capacity for independent operations has grown. A withdrawal plan needs to acknowledge this progress and build upon it, rather than undermine it.

Regional Stability and Evolving Threats

The geopolitical landscape surrounding Iraq is constantly shifting. Regional power dynamics, particularly between Iran and its proxies, and the broader Arab world, continue to influence Iraq's internal affairs. A withdrawal must be carefully coordinated to avoid creating a power vacuum that external actors could exploit. Furthermore, the

nature of threats has also evolved. While large territorial gains by extremist groups have been curtailed, the risk of resurgence or the emergence of new extremist factions remains a concern. The plan needs to address how to mitigate these threats through intelligence sharing and regional cooperation.

Economic and Political Realities

Iraq's economy, heavily reliant on oil, has faced significant strains. Continued military expenditure, both by Iraq and its international partners, places an additional burden on resources that could be directed towards reconstruction, development, and essential services. Politically, fostering genuine Iraqi sovereignty is paramount. An ongoing foreign military presence, even in a training capacity, can inadvertently stifle the development of independent governance and decision-making processes.

Pillars of a Practical Withdrawal Plan

A comprehensive plan for withdrawal from Iraq now must be built on several interconnected pillars. These pillars are designed to ensure that the transition is orderly, minimizes risks, and maximizes the chances of long-term stability and Iraqi self-sufficiency.

Pillar 1: Phased and Conditions-Based Redeployment

The core of any withdrawal plan is a phased approach. This means breaking down the process into manageable stages, with clear

objectives and triggers for moving from one phase to the next. It's not a sudden departure, but a deliberate, calibrated scaling down.

Defining Clear Benchmarks

Each phase of the withdrawal should be tied to specific, measurable, achievable, relevant, and time-bound (SMART) benchmarks. These benchmarks could include:

1. Increased Iraqi control over airspace and critical infrastructure.
2. Sustained Iraqi capability in counter-terrorism operations with minimal external support.
3. Demonstrated progress in dismantling foreign fighter networks and preventing their re-emergence.
4. Reduced reliance on external logistical and intelligence support.
5. Strengthening of Iraqi border security and customs.

Gradual Reduction of Military Footprint

The reduction of personnel and military assets should be gradual. This allows for the seamless transfer of responsibilities and the effective training and equipping of Iraqi forces. It also provides opportunities for adaptive planning should unforeseen challenges arise.

Pillar 2: Strengthening Iraqi Security Institutions

A successful withdrawal is intrinsically linked to the strength and sustainability of Iraq's own security apparatus. This pillar focuses on

empowering Iraqi forces to take full ownership of their national security.

Advanced Training and Capacity Building

Beyond basic training, the focus should be on specialized areas critical for long-term security: advanced intelligence analysis, cyber warfare defense, sophisticated logistics, and joint operations coordination. This ensures that Iraqi forces are equipped to handle a wider range of threats.

Reforming Security Sector Governance

True security requires more than just military might; it needs robust oversight and accountability. Support should be directed towards institutional reforms that enhance transparency, professionalism, and civilian oversight of the security sector. This includes strengthening judicial processes for prosecuting captured militants and ensuring adherence to human rights standards.

Demobilization, Disarmament, and Reintegration (DDR)

Addressing the issue of militias and non-state armed groups is crucial. A well-resourced DDR program, integrated with broader reconciliation efforts, can help demobilize combatants, disarm them, and reintegrate them into civilian life. This is a sensitive but vital component for lasting peace.

Pillar 3: Robust Diplomatic and Economic Engagement

Withdrawal does not mean disengagement. A strong diplomatic and economic presence will be essential to support Iraq's stability and development in the long term.

Continued Diplomatic Support and Partnership

Maintaining a strong embassy and diplomatic presence is vital for fostering bilateral relations, supporting Iraqi governance, and coordinating international efforts. This includes promoting regional dialogue and de-escalation.

Economic Diversification and Reconstruction Aid

Iraq's economic future is key to its stability. Continued international support for economic diversification away from oil dependency, investment in infrastructure, and assistance with essential services like healthcare and education will be critical. This helps to build a resilient economy that can support a stable society.

Humanitarian Assistance and Civil Society Support

The long-term impact of conflict often includes significant humanitarian needs. Continued support for humanitarian aid organizations and civil society groups working on reconciliation, trauma healing, and social cohesion is indispensable for rebuilding trust and fostering a more inclusive society.

Pillar 4: Intelligence Sharing and Counter-Terrorism Cooperation

While direct combat roles may diminish, the threat of terrorism will persist. A practical withdrawal plan must ensure that counter-terrorism efforts continue effectively through shared intelligence and coordinated action.

Enhanced Intelligence Exchange Mechanisms

Establishing robust, secure, and mutually beneficial intelligence sharing platforms with Iraqi agencies is paramount. This ensures that threats are identified and addressed proactively, both domestically and internationally.

Joint Counter-Terrorism Exercises and Advisory Roles

Limited advisory roles in areas like intelligence analysis, special operations, and border security can continue for a transitional period, focused on knowledge transfer and building Iraqi capacity. This should be strictly defined and time-limited.

Regional Counter-Terrorism Collaboration

Encouraging and facilitating counter-terrorism cooperation between Iraq and its regional neighbors can create a more effective bulwark against extremist groups and the flow of foreign fighters.

Addressing Potential Challenges and Risks

No withdrawal plan is without its challenges. A realistic assessment of potential risks and proactive mitigation strategies are crucial for success.

Risk of Resurgent Extremism

The primary concern is the potential for extremist groups to regain territory or influence. This can be mitigated by the robust strengthening of Iraqi security forces, effective intelligence gathering, and ongoing counter-narrative campaigns to combat extremist ideologies.

Internal Political Instability

Iraq's political landscape has often been volatile. A withdrawal must be timed and managed to avoid exacerbating internal divisions. Continued diplomatic engagement and support for inclusive governance are vital.

Regional Interference

External actors seeking to influence Iraqi policy or exploit instability remain a concern. A strong, unified international diplomatic front and clear communication with regional powers are essential to deter interference.

Economic Vulnerability

The Iraqi economy's reliance on oil makes it susceptible to global price fluctuations. Diversifying the economy and attracting foreign investment are long-term goals that require sustained international support.

The Path Forward: A Collaborative Transition

A *practical plan for withdrawal from Iraq now* is not a unilateral declaration of departure. It is a carefully orchestrated transition, built on partnership, shared responsibility, and a deep understanding of the complexities involved. It requires unwavering commitment from all stakeholders – the international coalition, the Iraqi government, and the Iraqi people.

The focus must shift from military presence to comprehensive support. This means investing in Iraq's future: its institutions, its economy, and its people. The goal is to empower Iraq to stand firmly on its own feet, secure its borders, and build a prosperous future free from the shadows of conflict and external interference. This is not an easy path, but with a clear, actionable, and conditions-based withdrawal plan, it is a path towards a more stable and sovereign Iraq, and a more secure world.

With shifting geopolitical dynamics and evolving security conditions in Iraq, a practical plan for withdrawal now has emerged as a critical

consideration for governments, military planners, and humanitarian actors alike. As regional tensions persist and domestic pressures mount, the momentum toward a timely and structured exit from Iraq gains urgency, demanding careful strategy, clear objectives, and sustainable implementation. Understanding the rationale, timeline, and operational dimensions of such a withdrawal is essential to ensure stability, protect interests, and support long-term resilience.

**Navigating the Strategic Landscape:
The Case for a Timely Withdrawal**

The concept of withdrawal from Iraq is not merely a military maneuver but a comprehensive geopolitical recalibration. Over the years, Iraq's sovereignty has strengthened, and internal institutions have matured, creating a more viable environment for reduced foreign military presence. A well-executed withdrawal now acknowledges Iraq's growing autonomy

while addressing lingering security concerns. This shift requires balancing strategic interests with respect for national self-determination, ensuring that the exit does not compromise regional stability or create power vacuums that could invite instability or external interference. By planning now, stakeholders can align military, diplomatic, and developmental efforts toward a smooth transition, minimizing disruption and fostering long-term partnerships.

A practical withdrawal plan begins with a thorough assessment of Iraq's current security posture and institutional capacity. This involves evaluating the readiness of local forces, the

sustainability of governance structures, and the ongoing threat of non-state actors. Intelligence-led analysis helps identify residual risks, enabling targeted force reductions rather than blanket withdrawals that might destabilize fragile gains. Coordinating with Iraqi leadership ensures that the plan reflects national priorities and builds trust, a crucial foundation for lasting cooperation post-withdrawal.

Key Components of a Coherent Withdrawal Strategy A successful withdrawal hinges on several interdependent elements. First, a phased approach allows for incremental reductions, giving Iraqi security forces

time to absorb responsibilities and adjust to new operational realities. This gradual pacing supports continuity in counterterrorism efforts and border integrity, preventing sudden lapses in security. Second, comprehensive training and advisory programs remain essential. Even as combat units reduce, specialized personnel can continue mentoring and advising, preserving local capacity and institutional memory. Third, logistical planning must address the safe redeployment of assets, including equipment, personnel, and infrastructure, ensuring nothing is left behind that could spark conflict or resentment.

Equally vital is the integration of

humanitarian and development components. A withdrawal should not signal abandonment but rather a transition to support through aid, capacity-building, and diplomatic engagement. Investing in local institutions strengthens governance and economic resilience, laying groundwork for a self-sufficient future. This holistic approach transforms withdrawal from a purely military decision into a comprehensive nation-building effort.

Practical Benefits and Broader Implications
Implementing a practical withdrawal plan now yields significant advantages. It reduces the risk of

prolonged occupation-driven friction, lowers operational costs, and redirects resources toward strategic priorities elsewhere. For Iraq, it affirms sovereignty and signals international confidence in its evolving role. For foreign actors, it enables a calibrated presence focused on diplomacy, intelligence, and economic collaboration rather than boots on the ground. Moreover, a well-managed exit models responsible military engagement—demonstrating that security partnerships can mature beyond traditional interventionist models.

Looking ahead, the future of Iraq's security landscape will depend on

adaptive governance, regional diplomacy, and sustained international support. A timely withdrawal now creates space for Iraq to navigate these challenges with greater autonomy, while maintaining vital partnerships. It sets a precedent for how nations can responsibly transition security roles in volatile regions—prioritizing stability, respect, and shared responsibility. As the region continues to evolve, such forward-thinking strategies will be instrumental in fostering enduring peace and cooperative security frameworks.

Out of Iraq: A Practical Plan for Withdrawal Now

The question of how and when to withdraw from Iraq has been a persistent and often contentious one since the initial invasion in 2003. Decades of conflict, immense human cost, and significant financial investment have underscored the urgent need for a clear, actionable, and strategically sound plan for disengagement. The phrase "Out of Iraq: A Practical Plan for Withdrawal Now" encapsulates this pressing sentiment, demanding a departure that prioritizes stability, security, and the long-term well-being of both Iraq and the region, while also considering the

geopolitical ramifications for global powers. This article delves into the complexities of such a withdrawal, exploring the essential components of a practical plan and the critical considerations that must inform its implementation.

The Evolving Landscape of the Iraq Conflict

Understanding the current situation in Iraq is paramount to devising an effective withdrawal strategy. The initial invasion, ostensibly aimed at disarming weapons of mass destruction and overthrowing Saddam Hussein, morphed into a protracted insurgency, sectarian violence, and the rise of extremist groups like ISIS. The involvement of international coalitions,

particularly the United States, has been marked by shifts in objectives, from nation-building and counter-terrorism to advising and assisting Iraqi security forces. The lingering presence of foreign troops, while intended to maintain security, has also been a source of friction and a catalyst for nationalist sentiment.

Key LSI keywords relevant to this section include: Iraq War, post-invasion Iraq, Iraqi security forces, sectarian violence, ISIS threat, counter-terrorism efforts, foreign military presence, regional stability, geopolitical dynamics.

Defining "Practical Withdrawal": Beyond Simple Departure

A truly practical withdrawal is not

merely a cessation of military operations and the departure of foreign personnel. It is a carefully orchestrated process designed to minimize negative consequences and maximize positive outcomes. This involves a multi-faceted approach encompassing:

1. Security Guarantees and Iraqi Sovereignty

The cornerstone of any withdrawal plan must be the robust capability of Iraqi security forces to independently maintain order and defend the nation's borders. This necessitates continued, albeit transformed, support for the Iraqi military and police. This support should shift from direct combat roles to training, advising, intelligence sharing, and the provision of critical equipment

and logistical assistance. The goal is to empower Iraqi institutions to assume full responsibility for their own security, thereby reinforcing their sovereignty and legitimacy in the eyes of their citizens.

Key considerations:

- 1. Capacity Building: Assessing the current capabilities of the Iraqi army, federal police, and counter-terrorism units. Identifying specific training needs, equipment shortfalls, and command and control weaknesses.**
- 2. Intelligence Sharing: Establishing secure and reliable channels for intelligence exchange to counter residual terrorist threats and organized crime.**

- 3. Border Security: Assisting Iraq in strengthening its border control mechanisms to prevent the ingress of militants and illicit goods.**
- 4. Disarmament of Non-State Actors: Developing strategies to address the proliferation of militias and armed groups operating outside of government control. This is a particularly complex challenge that requires diplomatic and political engagement alongside security measures.**

LSI keywords for this section: Iraqi army, federal police, counter-terrorism units, border security, disarmament, militias, non-state actors, Iraqi sovereignty, security cooperation.

2. Political Reconciliation and National Unity

The enduring challenges in Iraq are as much political as they are security-related. Decades of internal divisions, fueled by sectarianism and ethnic tensions, have hampered effective governance and national cohesion. A practical withdrawal must be synchronized with concerted efforts to foster political reconciliation and build a more inclusive and representative government. This involves:

Key considerations:

- 1. Inclusive Governance: Encouraging dialogue and power-sharing among all major political factions, including Sunni, Shia, and Kurdish**

communities. Addressing historical grievances and ensuring equitable representation.

2. Constitutional Reforms: Supporting efforts to amend the Iraqi constitution to better reflect the aspirations of all its citizens and provide a framework for long-term stability.

3. Anti-Corruption Measures: Strengthening mechanisms to combat corruption, which has been a significant impediment to good governance and public trust.

4. Economic Development and Reconstruction: Investing in Iraq's economic future is crucial for fostering stability. This includes supporting job creation, infrastructure

development, and diversification of the economy away from oil dependence. Rebuilding war-torn areas and providing essential services will be vital for winning the hearts and minds of the populace.

LSI keywords: political reconciliation, national unity, inclusive governance, power-sharing, constitutional reform, anti-corruption, economic development, reconstruction, sectarianism, ethnic tensions.

3. Humanitarian Assistance and Refugee Return

The humanitarian toll of years of conflict in Iraq has been immense. Millions have been displaced, and many

have suffered immense hardship. A responsible withdrawal must include provisions for continued humanitarian assistance and support for the safe and voluntary return of refugees and internally displaced persons (IDPs). This requires cooperation with international humanitarian organizations and a commitment to addressing the root causes of displacement.

Key considerations:

- 1. Refugee Resettlement: Facilitating the return of displaced populations to their homes, providing essential services, and addressing the lingering effects of trauma and displacement.**
- 2. Reconstruction of Infrastructure:**

Prioritizing the rebuilding of housing, schools, hospitals, and other essential infrastructure in areas most affected by conflict.

- 3. Psychosocial Support: Offering mental health and psychosocial support services to individuals and communities affected by violence and displacement.**
- 4. Landmine and Unexploded Ordnance Clearance: Continuing efforts to clear landmines and unexploded ordnance to ensure the safety of returning populations and facilitate economic recovery.**

LSI keywords: humanitarian assistance, refugee return, internally displaced persons (IDPs), reconstruction,

**infrastructure development,
psychosocial support, landmine
clearance, post-conflict recovery.**

4. Diplomatic Engagement and Regional Cooperation

**Iraq's stability is intrinsically linked to
the broader regional security landscape.
A withdrawal plan must be accompanied
by robust diplomatic engagement with
neighboring countries and key
international actors. This involves
building a regional consensus on
security and stability in Iraq, fostering
economic cooperation, and preventing
external interference.**

Key considerations:

1. Dialogue with Neighbors: Engaging in

constructive dialogue with countries like Iran, Saudi Arabia, Turkey, and Syria to de-escalate tensions and foster a cooperative approach to Iraq's security.

- 2. International Coordination: Working with the United Nations, European Union, and other international bodies to coordinate diplomatic efforts and provide humanitarian and development assistance.**
- 3. Preventing External Interference: Establishing clear boundaries and expectations regarding the involvement of external powers in Iraqi affairs to avoid proxy conflicts.**
- 4. Economic Partnerships: Encouraging regional economic partnerships that**

benefit Iraq and promote shared prosperity.

LSI keywords: diplomatic engagement, regional cooperation, international actors, UN, EU, Iran, Saudi Arabia, de-escalation, preventing interference, economic partnerships.

Timeline and Phased Approach

A "withdrawal now" does not necessarily imply an immediate and uncoordinated exodus. A practical plan necessitates a phased approach, with clear benchmarks and timelines. This allows for the gradual transition of responsibilities, the continuous assessment of progress, and the ability to adapt the strategy as circumstances

evolve. The pace of withdrawal should be dictated by the increasing capacity of Iraqi forces and institutions, rather than by arbitrary deadlines. This phased approach ensures that the withdrawal is not perceived as an abandonment, but rather as a strategic handover of responsibility.

Challenges and Risks

Implementing such a plan is fraught with challenges. The presence of deeply entrenched militias, the fragility of political institutions, the persistent threat of terrorism, and the complex regional power dynamics all pose significant obstacles. A premature or poorly executed withdrawal could reignite widespread conflict, empower

extremist groups, and further destabilize the region. Therefore, meticulous planning, sustained commitment to the outlined principles, and a willingness to adapt are essential.

Conclusion: Towards a Sustainable Peace

The call for a practical plan for withdrawal from Iraq now is a call for responsible disengagement. It is about recognizing that enduring peace and stability in Iraq can only be achieved through the empowerment of its own people and institutions. By prioritizing security capacity building, political reconciliation, humanitarian support, and robust diplomatic engagement, an exit strategy can be crafted that not only allows foreign forces to depart but also

sets the stage for a more secure, prosperous, and sovereign Iraq. The legacy of decades of intervention demands a final act that prioritizes the long-term well-being of the Iraqi nation and contributes to a more stable wider region.
