Once you're happy with your website, it's time to publish it! Options typically include "Anyone" (publicly accessible), "Specific people," or "Anyone at your organization" (if using Google Workspace). * **Search Engine Visibility:** Crucially, you'll have an option to "Ask search engines not to show my site." 1. Regular Updates and Maintenance

* **Content Freshness:** Regularly update your content to keep it relevant and engaging. Add new blog posts, update service descriptions, or showcase new projects. * **Broken Links:** Periodically check for broken links, especially if you're linking to external sites. * **Outdated Information:** Ensure all contact details, pricing, and other important information are current.

2. Search Engine Optimization (SEO) for Google Sites**

While Google Sites doesn't offer advanced SEO plugins like WordPress, you can still implement effective strategies: * **Keyword Research:**

Understand what terms your target audience is searching for. * **On-Page Optimization:**

* **Page Titles and Descriptions:** Although not directly editable in Google Sites for external search engines, use clear and descriptive page names that incorporate relevant keywords. *

* **Headings (H1, H2, etc.):** Use headings within your text to structure content and incorporate keywords. While Google Sites doesn't explicitly let you choose H1/H2 tags, using the "Title" and "Heading" text styles in your editor creates this hierarchy. * **Descriptive URLs:** Keep your web address and page names concise and relevant. * **Image Alt Text:**

When inserting images, Google Sites often uses the file name. Rename your image files descriptively before uploading, and ensure the text around the image is relevant. * **Internal Linking:**

Link relevant pages within your site together. This helps search engines understand your site structure and keeps users engaged. * **Mobile-Friendliness:** As Google Sites is responsive by default, this is largely handled for you. * **Embed Rich Media:**

Embedding videos and other interactive content can increase user engagement time on your site, which is a positive signal for SEO. * **Google Analytics and Search Console:**

While direct integration isn't as seamless as other platforms, you can use Google Tag Manager to add tracking codes for Google Analytics and Google Search Console.

This will give you valuable insights into your website traffic and search performance. * **LSI Keyword:** Optimizing your images with alt text is a fundamental SEO technique.

Troubleshooting Common Issues**

* **Site Not Appearing in Search Results:** Ensure you have not checked

the "Ask search engines not to show my site" box during publishing. Allow some time for search engines to crawl and index your new site. * **Links Not Working:** Double-check that you have correctly linked to the intended page or URL. Preview your site to test all links. * **Content Overlap or Formatting Issues:** Sometimes, complex layouts or embedded content can cause minor display issues. Use the preview function to catch these and adjust element sizes or spacing.
