Saying Goodbye to uTorrent on Your Mac: A Comprehensive Uninstall Guide

So, you've decided it's time to part ways with uTorrent on your Mac. Whether you're looking to free up disk space, switch to a different torrent client, or simply feel uTorrent isn't serving your needs anymore, uninstalling it properly is crucial. Many applications, especially those that interact with your system's network and file management, can leave behind residual files that clutter your system and might even cause minor performance hiccups if not cleaned up. This guide will walk you through the process of completely removing uTorrent from your macOS device, ensuring a clean and tidy departure.

Uninstalling applications on a Mac is generally straightforward, but for programs like torrent clients, a little extra attention to detail can save you from future headaches. We'll cover the standard method using the Applications folder and then dive into a more thorough approach to ensure no stray files are left behind. We'll also touch upon why a complete uninstall is beneficial and what to consider if you encounter any issues during the process. So, let's get started on how to uninstall uTorrent on Mac, making sure it's gone for good!

Why a Complete Uninstall Matters

You might be wondering, "Why bother with a deep clean? Can't I just drag the app to the Trash?" While dragging the uTorrent application icon to the Trash bin will remove the main program file, it's rarely enough to achieve a complete uninstall. Many applications create support files, preference files, cache data, and other related components that are stored in various locations across your macOS system. These can include your Library folder, temporary folders, and application support directories.

Leaving these residual files behind can:

1. **Consume valuable disk space:** Over time, these small files can add up, especially if you've used uTorrent extensively or uninstalled other similar applications.
2. **Cause conflicts with other software:** In rare cases, leftover preference files or settings from a previous installation of uTorrent could potentially interfere with new or existing applications, particularly other download managers or network-intensive programs.
3. **Lead to unexpected behavior:** If you decide to reinstall uTorrent in the future, remnants of a previous installation might cause glitches or prevent a fresh, clean setup.

Therefore, taking the time to perform a thorough uninstall

of uTorrent on your Mac is a good practice for maintaining a healthy and efficient operating system. This ensures that you're not just removing the visible application but also all its hidden digital footprints.

Method 1: The Standard Uninstall (Dragging to Trash)

This is the quickest and most common way to uninstall most Mac applications. For uTorrent, it's a good starting point, but remember, this method alone might not be sufficient for a complete removal. We'll build upon this in the next section.

Step 1: Quit uTorrent Completely

Before you can uninstall uTorrent, it's essential to make sure it's not running in the background. This prevents any files from being locked and inaccessible.

1. Click on the uTorrent icon in your Dock. If it has a black dot underneath it, it's running.
2. Right-click (or Control-click) on the uTorrent icon in the Dock.
3. Select "Quit" from the dropdown menu.

If uTorrent is still unresponsive, you can force quit it:

1. Press Command + Option + Esc simultaneously. This opens the "Force Quit Applications" window.

2. Select "uTorrent" from the list of applications.
3. Click the "Force Quit" button.

Step 2: Locate uTorrent in the Applications Folder

Now that uTorrent is closed, you can proceed to move it to the Trash.

1. Open a Finder window. You can do this by clicking the Finder icon (the blue smiley face) in your Dock.
2. In the Finder sidebar, click on "Applications." This will display a list of all applications installed on your Mac.
3. Scroll through the list to find the "uTorrent" application icon.

Step 3: Move uTorrent to the Trash

Once you've located uTorrent:

1. Click and drag the "uTorrent" icon from the Applications folder to the Trash icon located at the end of your Dock.
2. Alternatively, you can right-click (or Control-click) on the uTorrent icon and select "Move to Trash."

Step 4: Empty the Trash

Moving an application to the Trash doesn't immediately free up disk space. You need to empty the Trash.

1. Right-click (or Control-click) on the Trash icon in your Dock.
2. Select "Empty Trash" from the dropdown menu.
3. You might be prompted to confirm that you want to delete the items. Click "Empty Trash" again.

Congratulations! You've just performed the basic uninstall of uTorrent. However, as we discussed, there are likely still leftover files. Let's move on to a more comprehensive method.

Method 2: The Comprehensive Uninstall (Removing Residual Files)

This method involves manually locating and deleting the associated preference files, cache, and other supporting data left behind by uTorrent. This is where the real cleanup happens to ensure a complete uninstallation of uTorrent on your Mac.

Step 1: Ensure uTorrent is Quit and Moved to Trash

Before proceeding with this advanced method, make sure you have completed all the steps in "Method 1," including quitting uTorrent and moving it to the Trash. Emptying the Trash after moving the application is also recommended.

Step 2: Access the User Library Folder

The user Library folder is hidden by default on macOS. You'll need to reveal it to access the application support files.

1. Open Finder.
2. Click on the "Go" menu in the menu bar at the top of your screen.
3. Press and hold the **Option (Alt) key**. You will see a new "Library" option appear in the dropdown menu.
4. Click on "Library." This will open your user's Library folder.

Step 3: Locate and Delete uTorrent Related Files

Now, within the Library folder, you'll need to search for files and folders associated with uTorrent. This requires careful attention. Here are the common locations to check:

a) Application Support Folder

This is one of the most common places for an application's support files to reside.

1. In the opened Library folder, double-click on the "Application Support" folder.
2. Look for a folder named "uTorrent" or anything similar.

3. If you find such a folder, drag it to the Trash.

b) Preferences Folder

Preference files store your application settings. Removing these ensures a clean slate if you ever decide to reinstall.

1. Go back to the main Library folder (you can click the back arrow in the Finder window or repeat steps 1-3 if you closed it).
2. Double-click on the "Preferences" folder.
3. Look for files that start with "com.utorrent" or have "utorrent" in their name (e.g., com.utorrent.plist).
4. Drag any identified uTorrent preference files to the Trash.

c) Caches Folder

Cache files store temporary data that applications use to speed up operations. While less critical, they can still be removed for a thorough cleanup.

1. Go back to the main Library folder.
2. Double-click on the "Caches" folder.
3. Search for folders or files related to uTorrent (e.g., "com.utorrent.cache" or similar).
4. Drag any found uTorrent cache files or folders to the Trash.

d) Saved Application State Folder

This folder can sometimes contain data related to an application's state.

1. Go back to the main Library folder.
2. Double-click on the "Saved Application State" folder.
3. Look for a folder named something like
"com.utorrent.savedState."
4. If found, drag this folder to the Trash.

e) Logs Folder

Some applications generate log files that might remain after uninstallation.

1. Go back to the main Library folder.
2. Double-click on the "Logs" folder.
3. Search for any uTorrent-related log files and drag them to the Trash.

Step 4: Empty the Trash Again

After deleting all the identified uTorrent-related files and folders from your Library, you need to empty the Trash one more time to permanently remove them from your Mac.

1. Right-click (or Control-click) on the Trash icon in your Dock.
2. Select "Empty Trash."

3. Confirm the action when prompted.

By following these steps, you've performed a much more thorough uninstallation of uTorrent on your Mac, ensuring that your system is free from its traces.

Alternative Method: Using Third-Party Uninstaller Apps

For users who prefer a more automated and sometimes less error-prone approach, third-party uninstaller applications can be a great option. These tools are designed to scan your Mac for an application and all its associated files, then delete them with a few clicks. This can be particularly useful if you're not comfortable navigating the Library folder manually or if you want to ensure no file is missed.

How Third-Party Uninstallers Work:

You typically download and install an uninstaller app. Then, you select the application you want to remove (in this case, uTorrent) from a list provided by the uninstaller. The app will then scan your system for all related files and prompt you to confirm their deletion.

Popular Uninstaller Apps for Mac:

1. **AppCleaner:** A popular, free, and straightforward

uninstaller.

2. **CleanMyMac X:** A comprehensive cleaning utility that includes a powerful uninstaller module. This is a paid application but offers many other system maintenance features.
3. **Hazel:** While not strictly an uninstaller, Hazel can be configured to automatically move files to the Trash based on rules, which can be used to clean up leftover application data.

Steps Using a Third-Party Uninstaller (General):

1. Download and install your chosen uninstaller application.
2. Launch the uninstaller.
3. Drag the uTorrent application icon from your Applications folder into the uninstaller's window.
4. The uninstaller will then display a list of all found associated files (preferences, caches, support files, etc.).
5. Review the list to ensure it's accurate, then click the "Remove" or "Uninstall" button.
6. The uninstaller will handle the deletion process.

While these tools can be very convenient, always exercise caution. Ensure you download them from reputable sources to avoid malware. Also, take a moment to review the files the uninstaller proposes to delete before

confirming.

Troubleshooting Common Uninstall Issues

Even with the best intentions, you might encounter a few bumps along the road when trying to uninstall uTorrent on your Mac. Here are some common issues and how to address them:

Issue: "uTorrent is in use and cannot be deleted."

Solution: This usually means uTorrent is still running in the background. Double-check that you've quit it using the Dock or Force Quit (Command + Option + Esc). Also, ensure no related processes are active using Activity Monitor. To access Activity Monitor, go to Applications > Utilities > Activity Monitor. Search for "uTorrent" and quit any related processes.

Issue: "Cannot find specific residual files."

Solution: Sometimes, the names of residual files or folders might vary slightly depending on the version of uTorrent you had installed or specific system configurations. If you can't find an exact match, look for

similar names. For example, instead of "com.utorrent.plist," you might find "com.utorrent.settings.plist." It's also possible that some versions don't create all the types of files mentioned. If you've already moved the main application to Trash and emptied it, and can't find any other obvious uTorrent-related files, you've likely achieved a sufficient level of uninstallation.

Issue: Accidentally deleted the wrong file.

Solution: If you've emptied the Trash and realized you deleted an important system file, your best bet is to restore it from a Time Machine backup if you have one set up. If not, some system files can be reinstalled by reinstalling macOS. For application-specific files you've deleted from the Library, if it was a critical file, you might need to reinstall the application it belonged to to generate a fresh copy.

Final Thoughts: Keeping Your Mac Tidy

Uninstalling uTorrent on your Mac is a simple process that can become even more effective with a bit of extra effort. By following the comprehensive steps outlined in this guide, you ensure that your system is not cluttered with

unnecessary files. This not only frees up disk space but also contributes to a smoother and more stable computing experience. Whether you prefer the manual approach to understand exactly what's being removed or opt for the convenience of a third-party uninstaller, the goal is the same: a clean and efficient Mac.

Regularly performing these clean-up tasks for any application you uninstall is a good habit for any Mac user. It helps maintain the health of your operating system and prevents potential conflicts or performance issues down the line. If you're looking for alternative torrent clients, consider exploring options like Transmission, Deluge, or qBittorrent, which are often praised for their user-friendly interfaces and robust feature sets.

We hope this guide has been helpful in guiding you through how to uninstall uTorrent on your Mac effectively. Happy downloading (or not downloading, as the case may be)!

Uninstalling uTorrent on macOS: A Comprehensive Guide
For many Mac users seeking a streamlined, lightweight browsing and downloading experience, uTorrent remains a popular choice. However, there are times when users decide to remove it—whether to free up system resources, enhance privacy, or replace it with a more modern alternative. Understanding how to uninstall uTorrent on a Mac properly ensures a clean and efficient system without

lingering processes or configuration files. To begin, uninstalling uTorrent on a Mac does not require a complex system-level command; instead, it involves a straightforward process through the built-in preferences and application management tools. Most users mistakenly believe that simply deleting the launchpad icon is sufficient, but this often leaves residual files, caches, and registry entries that can slow down performance or cause conflicts with other software. A more reliable approach starts with removing uTorrent via the Applications folder and the System Preferences. First, locate the uTorrent application. On your Mac, open the Applications folder, typically found in the Services or Applications folder. Scroll through the list to find uTorrent—usually appearing under the "Utilities" or general software categories. Drag the uTorrent icon from the Applications window to the Trash. This initial removal eliminates the primary interface, but some background processes or config files may remain. For a deeper clean-up, access the System Preferences to remove any lingering components. While macOS does not expose direct uninstall options for most launched apps, clearing temporary files and caches helps eliminate residual data. Use the built-in Disk Utility or third-party tools like OnyX (with caution) to scan and purge temporary uTorrent caches. More importantly, checking the Library folder in Finder for any uTorrent-related subdirectories—such as .uTorrent or startup items—ensures no hidden processes persist. Manually

deleting these folders under Library can prevent future auto-launch and system bloat. Beyond removal, understanding the applications that might integrate with uTorrent is key. For example, some third-party privacy or torrent management tools may reference uTorrent components. Reviewing and modifying launch agents or automated startup items in System Preferences > Users & Groups > Login Items helps prevent unintended launches. This step ensures uTorrent does not sneak back into system operations. The benefits of uninstalling uTorrent extend beyond a cleaner desktop. Removing the application reduces background resource usage, improving overall Mac responsiveness—especially beneficial on older models or devices with limited RAM. It also enhances privacy by eliminating potential telemetry or data collection services tied to the client. Furthermore, clearing uTorrent frees up disk space and reduces security risks associated with outdated or compromised software. Looking ahead, while uTorrent remains functional, the future of macOS torrenting leans toward privacy-focused, open-source alternatives like QBittorrent or Deluge, which offer greater transparency and fewer data concerns. As user awareness grows, uninstalling legacy clients like uTorrent becomes part of a broader trend toward minimalist, secure digital habits. By mastering the uninstall process, Mac users take a meaningful step toward optimizing their operating system and maintaining control over their digital environment. Proper

uninstallation is not just a technical task—it's an act of digital hygiene. By following a thorough, methodical approach, users ensure their Mac runs efficiently, securely, and with only the tools they truly need.

Mastering macOS: A Comprehensive Guide on How to Uninstall uTorrent on Mac

As a macOS user, you likely appreciate the elegance and efficiency of your operating system. Whether you're a seasoned pro or new to the Apple ecosystem, managing installed applications is a fundamental skill. While many Mac applications integrate seamlessly, sometimes you encounter software that requires a more deliberate approach to removal. One such application that has historically caused consternation for some Mac users is uTorrent. This guide will provide a detailed, analytical, and SEO-friendly breakdown of precisely **how to uninstall uTorrent on Mac**, ensuring a clean and complete removal.

uTorrent, a popular BitTorrent client, facilitates peer-to-peer file sharing. While it serves a specific purpose, its presence on your Mac might become redundant, or you may have concerns about its resource usage, potential security implications, or simply a desire to declutter your

Applications folder. Regardless of your motivation, a proper uninstallation process is crucial to avoid leaving behind residual files, preference panes, or associated services that could impact your Mac's performance. This article will not only walk you through the steps but also explain the rationale behind them, incorporating relevant LSI keywords to enhance discoverability for users searching for solutions.

Why a Thorough Uninstall Matters for uTorrent on Mac

Simply dragging an application's icon to the Trash bin on macOS is often insufficient for a complete uninstall. Many applications, including uTorrent, create associated files scattered across your system. These can include:

1. **Preference Files:** Stored in your User Library, these files contain your custom settings for the application.
2. **Cache Files:** Temporary files used by the application to speed up operations.
3. **Support Files:** Data essential for the application's functionality, often found in various Library folders.
4. **Launch Agents/Daemons:** Background processes that run automatically, even when the main application isn't open.
5. **Application Support Folders:** Dedicated folders within your Library that house application-specific data.

Failing to remove these remnants can lead to several issues:

1. **Disk Space Inefficiency:** Unnecessary files consume valuable storage space.
2. **Conflicting Software:** Residual files can sometimes interfere with other applications.
3. **Performance Degradation:** Background processes might continue to consume system resources.
4. **Installation Issues:** If you ever decide to reinstall uTorrent, leftover files could cause conflicts.

Therefore, understanding **how to remove uTorrent from Mac** involves more than just a drag-and-drop operation. We'll explore both the manual method and the more efficient, automated approach using specialized uninstaller tools.

Method 1: The Manual Uninstall Process for uTorrent on Mac

While more time-consuming, the manual method provides a deeper understanding of where application components reside on your Mac. This is often the preferred method for users who want complete control and assurance of a thorough cleanup. Follow these steps meticulously to ensure you've covered all bases when learning **how to uninstall uTorrent on Mac**.

Step 1: Quit uTorrent Completely

Before you begin the uninstallation process, ensure that uTorrent is not running. If it's open in the background, it might prevent you from deleting its associated files.

1. Click on the **uTorrent** menu in the top-left corner of your screen.
2. Select **Quit uTorrent**.
3. Alternatively, you can use the keyboard shortcut:
Command + Q.
4. If uTorrent is still unresponsive, open **Activity Monitor** (found in Applications > Utilities). Search for "uTorrent" and select the process, then click the "X" button to force quit.

Step 2: Move uTorrent to the Trash

This is the standard macOS application removal step. It removes the main application executable.

1. Open your **Applications** folder in Finder.
2. Locate the **uTorrent** application icon.
3. Click and drag the **uTorrent** icon to the **Trash** icon in your Dock.
4. Alternatively, right-click (or Control-click) on the uTorrent icon and select **Move to Trash**.

Step 3: Empty the Trash

Simply moving the application to the Trash doesn't free up disk space until you empty it.

1. Right-click (or Control-click) on the **Trash** icon in your Dock.
2. Select **Empty Trash**.
3. Confirm your action when prompted.

Step 4: Locate and Delete uTorrent's Associated Files

This is the most critical part of a manual uninstall. These files are often hidden within your User Library folder. To access the Library folder, you'll need to:

1. Open **Finder**.
2. Click on the **Go** menu in the top menu bar.
3. Hold down the **Option (Alt)** key. The **Library** option will appear.
4. Click on **Library**.

Once the Library folder is open, navigate to the following locations and delete any files or folders explicitly related to uTorrent:

a) Application Support Folder

Check the following directory:

~/Library/Application Support/

Look for a folder named **uTorrent** or something similar.
Delete this folder if found.

b) Preferences Folder

Navigate to:

~/Library/Preferences/

Search for files named like
com.bittorrent.uTorrent.plist or similar. Delete these
preference files.

c) Caches Folder

Explore the caches directory:

~/Library/Caches/

Look for any folders or files related to uTorrent and delete
them.

d) Saved Application State

Some applications store their state in this folder:

~/Library/Saved Application State/

Search for a folder named
com.bittorrent.uTorrent.savedState and delete it.

e) Other Potential Locations

While less common, uTorrent might leave traces in other Library subfolders. If you're thorough, you might also want to check:

1. ~/Library/Containers/ (less likely for older macOS versions or applications not sandboxed this way)
2. ~/Library/Logs/ (look for uTorrent-related log files)
3. ~/Library/Cookies/ (rare, but check for uTorrent-related cookies)

Important Note: Be cautious when deleting files from your Library. Deleting the wrong file can cause issues with other applications or macOS itself. If you are unsure, it's best to leave the file or do further research.

Step 5: Restart Your Mac

After completing the manual deletion of files, a restart can help ensure that any lingering background processes are terminated and your system fully recognizes the changes. This is a good practice when learning **how to uninstall uTorrent on Mac** effectively.

Method 2: Using a Dedicated Uninstaller Application

For users who prefer a faster, more automated, and less error-prone method, dedicated uninstaller applications are

an excellent solution. These tools are designed to scan your Mac for an application and all its associated components, then remove them with a single click. This is often the most efficient way to **uninstall uTorrent on Mac** and other software.

How Uninstaller Apps Work

Uninstaller applications typically perform the following functions:

1. **Application Detection:** They scan your Applications folder and other common locations for installed software.
2. **Deep Scan:** Once an application is selected, they perform a comprehensive scan of your system for all related files (preferences, caches, support files, launch agents, etc.).
3. **Categorized Listing:** They present a clear list of all found files, allowing you to review before deletion.
4. **One-Click Removal:** With a single click, they delete all selected components, effectively uninstalling the application.

Popular Uninstaller Applications for Mac

There are several reputable uninstaller applications available for macOS. Some popular and highly-rated

options include:

1. **AppCleaner:** A free and user-friendly option that allows you to drag and drop applications into its interface to find associated files.
2. **CleanMyMac X:** A more comprehensive system cleaning tool that includes a robust uninstaller module. It's a paid application but offers many other optimization features.
3. **AppDelete:** Another paid but powerful uninstaller that offers advanced search and filtering capabilities.

Using AppCleaner as an Example (Free Option)

AppCleaner is a great starting point for users who want a free and easy-to-use uninstaller.

1. **Download and Install AppCleaner:** Obtain AppCleaner from its official website and install it by dragging it to your Applications folder.
2. **Launch AppCleaner:** Open AppCleaner from your Applications folder.
3. **Drag and Drop uTorrent:** Locate the **uTorrent** application in your Applications folder and drag its icon directly into the AppCleaner window.
4. **Review and Delete:** AppCleaner will then display a list of all associated files it has found. Review this list carefully to ensure no essential system files are

included (though AppCleaner is generally very good at distinguishing).

5. **Click Delete:** Click the **Delete** button at the bottom of the window. AppCleaner will remove all identified files related to uTorrent.
6. **Empty Trash:** AppCleaner will move the deleted files to your Trash. Remember to empty your Trash afterward to free up disk space.

Using an uninstaller application is generally the safest and most efficient method for **how to uninstall uTorrent on Mac**, especially for beginners or those who want to avoid manually searching through system folders.

described in Method 1, Step 1).

2. Make sure you are logged into an administrator account on your Mac.
3. When prompted, grant permission to move files to the Trash.
4. If a file is persistently locked, try restarting your Mac and then attempting deletion again.

Can't Find All Associated uTorrent Files

Reason: Some files might be in less common locations, or the manual search might have missed them. This is where uninstaller tools excel.

Solution:

1. Double-check all the Library folders mentioned in Method 1.
2. Use a reputable uninstaller application (Method 2) to perform a thorough scan.
3. Ensure you have hidden files and folders set to be visible if you're manually searching. You can do this in Finder by pressing **Command + Shift + . (period)**.

uTorrent Still Appears in Login Items

Reason: The uninstall process might not have removed the entry that launches uTorrent at startup.

Solution:

1. Go to **System Settings** (or System Preferences on older macOS versions).
2. Navigate to **General > Login Items** (or Users & Groups > Login Items).
3. Look for any entries related to uTorrent.
4. Select the uTorrent entry and click the minus (-) button to remove it.

Post-Uninstall Best Practices

After successfully uninstalling uTorrent, consider these steps to ensure your Mac remains optimized:

1. **Empty the Trash:** Always remember to empty your Trash after deleting files to reclaim disk space.
2. **Disk Utility:** Periodically run Disk Utility (found in Applications > Utilities) to check and repair disk permissions, which can sometimes resolve minor system glitches.
3. **Software Updates:** Ensure your macOS and other applications are up to date to benefit from the latest security patches and performance improvements.

By following these comprehensive steps, you can confidently learn **how to uninstall uTorrent on Mac**, ensuring a clean system and optimal performance. Whether you opt for the manual method for a deep dive or the efficiency of an uninstaller tool, the goal is always a

complete removal of unwanted software and its digital footprint.

Questions & Answers About how to uninstall utorrent on mac

No	Question	Answer
1	I'm done with uTorrent on my Mac, how do I completely remove it without leaving any junk files behind?	To uninstall uTorrent from your Mac, first quit the application. Then, drag the uTorrent application from your Applications folder to the Trash. Finally, you'll need to manually remove its preference files and cache. Open Finder, go to 'Go' > 'Go to Folder...', and type `~/Library/Application Support/` and delete the 'uTorrent' folder. You can also search for `~/Library/Preferences/` and `~/Library/Caches/` for any remaining uTorrent-related files.

2	Why is uTorrent still running in the background even after I thought I closed it? How do I stop it and uninstall?	uTorrent often runs processes in the background even after closing the main window. To ensure it's fully stopped before uninstalling, open 'Activity Monitor' (Applications > Utilities), search for 'uTorrent', select any related processes, and click the 'X' button to 'Force Quit'. Once all processes are terminated, proceed with dragging the uTorrent application to the Trash and cleaning up its associated files as described in other answers.
3	Is there a simpler way to uninstall uTorrent on Mac, or do I really have to dig through library folders?	While manually removing preference and cache files is the most thorough method, you can simplify the process using a dedicated uninstaller app. Many third-party uninstaller tools are available that can scan your system for all files associated with an application, including uTorrent, and remove them with a single click. This can be a quicker and more convenient option.
4	What are the main files and folders I need to delete to ensure uTorrent is fully gone from my Mac?	The primary files and folders to target for a complete uTorrent uninstall on Mac are: the uTorrent application itself (in your Applications folder), <code>~/Library/Application Support/uTorrent`</code> , <code>~/Library/Preferences/com.utorrent.download.er.plist`</code> (or similar), and any <code>`uTorrent`</code> related files found within <code>~/Library/Caches/`</code> .
5	Will uninstalling uTorrent affect my downloaded torrent files or the trackers I was using?	Uninstalling uTorrent itself will not delete your downloaded .torrent files or the actual content you downloaded. However, the application will no longer be associated with opening .torrent files. If you want to stop all torrenting activity, you'll need to manually delete the downloaded content files as well. Your tracking information within the uTorrent application will be lost upon uninstall.
