Think of it as the system that connects all the moving parts of a business, from order processing to marketing campaigns. **(Table 1: Key Components of an MIS)**

Component	Description	Example
Hardware	Physical devices like computers, servers, and networks	Laptop used by a sales representative to track customer data.
Software	Programs and applications that manage data and processes	CRM software managing customer relationships.
Data	Raw facts and figures collected and processed	Sales figures for the month, customer demographics.
Procedures	Rules and guidelines for using the system	Workflow for processing orders, internal security protocols.
People	Individuals who operate, manage, and use the system	Database administrators, analysts, and end-users.

The Importance of MIS in Today's Business
