Others are drawn to a different lifestyle, a slower pace of life, or a richer cultural experience. The financial incentives also play a significant role, with some countries offering significantly lower property prices than those found in their home countries. This can translate into more space for the same budget, or an opportunity to own a property that would be otherwise unattainable. The following chart illustrates the key motivations for buying overseas property:

Motivation	Percentage (Estimated)
Climate/Lifestyle	45%

be considered the sole source of information when making such a significant financial decision.
