Today, we're diving deep into the specifics of a CLIL unit titled "Animals Our Friends," and specifically focusing on the "book" component that forms its cornerstone. This article aims to be a comprehensive, natural, and SEO-optimized guide for educators, offering

insights into how to best utilize this resource and for parents, providing an understanding of the learning journey their children will embark on. The concept of "Animals Our Friends" is inherently engaging for young learners. Children are naturally drawn to animals, their diverse forms, behaviors, and habitats. By framing animals as "friends," the unit fosters empathy, respect, and a sense of responsibility towards the natural world. The "book" within this CLIL unit serves as the central hub, a gateway to exploring this theme through both content and language. It's not just a collection of pages; it's a carefully crafted tool designed to stimulate curiosity, encourage active participation, and build crucial foundational skills.

Understanding the CLIL Approach in "Animals Our Friends"

Before we delve into the specifics of the book, it's crucial to understand the CLIL framework as it applies to our "Animals Our Friends" unit. CLIL is built on the '4Cs' model: Content, Communication, Cognition, and Culture.

1. **Content:** This refers to the subject matter being taught – in this case, the diverse world of animals. Learners will acquire knowledge about different animal types, their characteristics, their homes (habitats), what they eat (diets), and how they interact with their environment and with humans.
2. **Communication:** This is where the language learning element comes in. Through the "Animals Our Friends" book and associated activities, children will be exposed to and encouraged to use new vocabulary related to animals (e.g., 'lion', 'elephant', 'bird', 'fish', 'feather', 'fur', 'paw', 'wing'), descriptive adjectives (e.g., 'big', 'small', 'fluffy', 'scaly', 'fast', 'slow'), and simple verbs related to animal actions (e.g., 'run', 'fly', 'swim', 'roar', 'chirp').
3. **Cognition:** CLIL units promote higher-order thinking skills. For "Animals Our Friends," this might involve comparing and contrasting different animals, classifying them by their features or habitats, problem-solving related to animal welfare, and developing memory skills through recalling animal facts.
4. **Culture:** This aspect encourages an understanding and appreciation of the

broader context. For animal units, this can involve exploring how different cultures view and interact with animals, learning about endangered species and conservation efforts, and understanding the role animals play in our lives (as pets, for food, in stories).

The "Animals Our Friends" book is strategically designed to weave these four strands together, ensuring a holistic and enriching learning experience.

The "Animals Our Friends" Book: More Than Just Pages
