The Philosophy Behind Everyday Mathematics: A Hands-On Approach

Everyday Mathematics, often referred to as "EM4," is a comprehensive curriculum developed by the University of Chicago School Mathematics Project. Its core philosophy revolves around making mathematics accessible, engaging, and relevant to children's lives. Unlike traditional curricula that may focus on isolated skills, EM4 emphasizes a holistic approach, integrating various mathematical strands and encouraging students to see the interconnectedness of mathematical concepts. For Grade 4, this translates into a curriculum that:

1. **Connects Math to Real Life:** EM4 consistently bridges the gap between abstract mathematical ideas and tangible, everyday experiences. This helps students understand **why** they are learning certain concepts and how they apply to the world around them.
2. **Promotes Problem-Solving:** The curriculum is rich with opportunities for students to engage in challenging problem-solving tasks that require critical thinking, strategic planning, and the application of learned procedures.
3. **Uses Multiple Representations:** Recognizing that students learn in diverse ways, EM4 presents concepts through various methods, including manipulatives, diagrams, number lines, tables, graphs, and verbal explanations. This caters to different learning styles and deepens comprehension.
4. **Encourages Collaboration:** Group work and partner activities are integral to the EM4 experience, fostering communication skills and allowing students to learn from each other's perspectives and

problem-solving strategies.

Grade 4: Building on the Foundation

Fourth grade in Everyday Mathematics is a pivotal year where students solidify their understanding of whole numbers and begin to explore fractions, decimals, and geometry in more depth. The study links at this level are designed to seamlessly build upon what was learned in earlier grades while introducing new, more abstract concepts. Key areas of focus for Grade 4 EM4 include:

Number and Operations in Base Ten

Students delve deeper into place value, extending their understanding to larger numbers (millions). They refine their skills in addition and subtraction of multi-digit numbers, often using various algorithms and strategies. Multiplication and division also take center stage. Fourth graders are expected to:

1. **Master Multiplication Facts:** Fluency with multiplication facts up to 12×12 is a significant goal, as it underpins more complex operations.
2. **Develop Multiplication Algorithms:** Students explore and apply various algorithms for multiplying multi-digit numbers, such as the standard algorithm, lattice multiplication, and partial products. Understanding the underlying logic of these algorithms is emphasized.
3. **Explore Division Strategies:** Division concepts are introduced and developed, including understanding remainders and using strategies like partial quotients.
4. **Understand Factors and Multiples:** Identifying factors and multiples of numbers helps build a stronger number sense and prepares them for fraction operations.

Fractions and Decimals

This is a major area of growth in Grade 4. EM4 focuses on building a strong conceptual understanding of fractions and their relationship to decimals. Students will:

1. **Understand Equivalence:** Learning to identify and generate equivalent fractions is crucial for comparing, adding, and subtracting fractions.
2. **Compare and Order Fractions:** Students develop strategies for comparing fractions with like and unlike denominators.
3. **Add and Subtract Fractions:** With a solid understanding of equivalence, students can then learn to add and subtract fractions, initially with like denominators and later with unlike denominators.
4. **Connect Fractions and Decimals:** The curriculum explicitly links fractions and decimals, particularly those with denominators of 10 and 100, laying the groundwork for further exploration in later grades.

Measurement and Data

Measurement skills are applied in practical contexts. Fourth graders work with:

1. **Units of Measurement:** They solidify their understanding of customary and metric units of length, weight, and capacity, and learn to convert between them.

2. **Area and Perimeter:** Students calculate the area and perimeter of rectangles and explore the relationship between them.
3. **Data Analysis:** They learn to collect, organize, and interpret data using various representations like bar graphs and line plots.

Geometry

Geometric concepts are introduced and explored through hands-on activities and visual representations. Fourth graders will:

1. **Classify Quadrilaterals:** Understanding the properties of various quadrilaterals (squares, rectangles, parallelograms, trapezoids) and their hierarchical relationships.
2. **Identify Angles:** Learning to identify and classify different types of angles (acute, obtuse, right, straight).
3. **Explore Lines and Symmetry:** Understanding parallel and perpendicular lines and identifying lines of symmetry in shapes.

Study Links and Resources for Grade 4 EM4

The strength of the Everyday Mathematics curriculum lies in its interconnectedness. Concepts are revisited and reinforced throughout the year, ensuring a deep and lasting understanding. The 'study links' in EM4 are not merely homework assignments; they are carefully crafted opportunities to:

1. **Reinforce Daily Lessons:** Study links provide practice and extension of the concepts introduced in the classroom, allowing students to solidify their learning.
2. **Promote Independent Practice:** They encourage students to work independently, developing self-reliance and problem-solving skills outside of direct instruction.

Sharing Everyday Mathematics Study Links Grade 4

Sharing Everyday Mathematics Study Links Grade 4 with others can be a positive way to spread knowledge, encourage learning, and build communities around shared interests. In general, only free, open-access, or public domain versions of Everyday Mathematics Study Links Grade 4 may be shared freely.
