Ready for Revolution: The CNT Defense Committees in Barcelona, 1933-1938

The air in Barcelona in the years leading up to and during the Spanish Civil War was thick with a potent mix of hope, fear, and an unyielding desire for change. Amidst this volatile atmosphere, a crucial, often overlooked, element played a pivotal role in the unfolding drama: the Defense Committees of the Confederación Nacional del Trabajo (CNT). These were not just abstract organizational structures; they were the flesh and blood of a revolution, the everyday citizens, workers, and anarchists who stood ready to defend their newfound freedoms and ideals. From 1933 to 1938, these committees evolved from local self-defense units to sophisticated operational bodies, embodying the spirit of popular resistance and an unwavering commitment to anarcho-syndicalism.

The Seeds of Resistance: Pre-Civil War Tensions

To understand the significance of the CNT Defense Committees, we must first grasp the socio-political landscape of Spain in the early 1930s. The Second Spanish Republic, established in 1931, brought with it a wave of optimism and promises of reform.

However, these reforms often fell short of the radical aspirations of the working class, particularly the ardent anarcho-syndicalists who formed the backbone of the CNT. Barcelona, a vibrant industrial hub, was a hotbed of revolutionary sentiment. The CNT, with its vast membership and commitment to direct action and libertarian communism, was a formidable force. Yet, it faced constant pressure from both the state and its political opponents. The specter of repression loomed large, making self-defense a paramount concern for the organization and its members. This is where the nascent Defense Committees began to emerge, initially as localized responses to police brutality and employer lockouts. They were informal, often spontaneous gatherings of CNT militants who would organize watch duties, provide a visible presence during strikes, and act as a deterrent against provocations.

The Rise of Formalized Defense: The CNT's Strategic Shift

The period between 1933 and the outbreak of the Civil War in 1936 saw a more organized and strategic approach to defense within the CNT. The increasing political polarization and the growing threat of a fascist backlash prompted the union to invest more resources and attention into its defense apparatus. The Defense Committees began to acquire a more formal structure, moving beyond ad-hoc arrangements. While the exact organizational blueprint varied across different neighborhoods and syndicates, a general pattern emerged. These committees were typically composed of trusted CNT members, often those with a background in anarchist activism or experience in unions. Their primary functions included:

1. **Intelligence Gathering:** Keeping an eye on the activities of counter-revolutionary forces, including fascists, monarchists, and even elements within the state security apparatus.
2. **Dissemination of Information:** Acting as conduits for revolutionary propaganda and news, ensuring that CNT members and sympathizers were kept informed.

3. **Training and Preparedness:** Organizing rudimentary training in self-defense, the use of rudimentary weapons, and tactical awareness. This was not about creating a standing army, but about fostering a spirit of readiness and competence.
4. **Mobilization:** Being able to quickly mobilize members in response to specific threats or calls to action, such as strikes, demonstrations, or perceived attacks on the working class.

This period was characterized by a growing awareness that a purely ideological commitment to revolution would be insufficient without the practical means to defend it. The CNT, deeply rooted in the principles of decentralization and worker autonomy, ensured that these Defense Committees, while coordinated, maintained a significant degree of local control. This reflected the anarchist ideal of "liberty from below."

The Crucible of Conflict: Defense Committees in the Spanish Civil War (1936-1938)

The Nationalist uprising in July 1936 acted as the ultimate test for the CNT Defense Committees. In Barcelona, the response was swift and decisive. When

the military coup attempted to seize control of the city, it was met with immediate and fierce resistance, spearheaded by the CNT and its well-established Defense Committees. These committees, which had been preparing for such an eventuality, became the frontline of the anti-fascist struggle. They were instrumental in:

1. **Countering the Coup:** The Defense Committees, along with armed militias drawn from the CNT, played a critical role in disarming the rebelling troops and securing key infrastructure. Barricades were erected, and street-by-street fighting ensued, with the committees coordinating defensive efforts and directing revolutionary combatants.
2. **Organizing Militias:** Many of the initial militias that formed to fight the fascists were organized and mobilized through the Defense Committees. They were the recruiting grounds and the logistical hubs for these armed groups.
3. **Maintaining Order and Revolutionary Institutions:** In the immediate aftermath of the coup, the Defense Committees also took on the task of maintaining order in their neighborhoods, preventing looting, and safeguarding the nascent revolutionary gains, such as the collectivization of industries and land.

4. **Internal Security:** They were also responsible for internal security within the CNT, identifying and neutralizing potential provocateurs or saboteurs.

The period of 1936-1938 in Barcelona was a whirlwind of revolutionary fervor. The streets were alive with the presence of armed workers, the slogans of anarchism plastered on walls, and the spirit of the revolution palpable. The Defense Committees were the silent orchestrators, the invisible threads connecting the individual act of defiance to the collective struggle. Their members, often ordinary workers by day, became vigilant guardians of the revolution by night. This era saw the committees evolve from defensive units to active combat participants, demonstrating the adaptability and resilience of the CNT's organizational structure.

Challenges and Evolution: The Later Years

While the early days of the war saw the Defense Committees at their most potent, the subsequent years brought new challenges. As the war progressed, the Republican government, increasingly dominated by more centralized and statist forces (including Soviet influence), began to exert pressure

on the autonomous revolutionary structures like the CNT's Defense Committees. The integration of militias into a more conventional army, the suppression of anarchist revolutionary initiatives, and the internal political struggles within the Republican camp all impacted the role and autonomy of these committees.

By 1938, the situation had become increasingly complex. The libertarian revolution, while still alive in pockets, faced immense military and political pressure. The Defense Committees, though still operational in many areas, saw their influence wane as the war effort became increasingly centralized and militarized. The Spanish Civil War, a brutal conflict that ultimately saw the defeat of the Republican forces, was a tragedy for the anarchist movement and its revolutionary experiments. The CNT Defense Committees, born out of a desire for self-determination and revolutionary defense, ultimately succumbed to the overwhelming forces of fascism and the internal divisions within the Republican side.

The Legacy of the Defense Committees

The CNT Defense Committees in Barcelona between 1933 and 1938 represent a fascinating and inspiring chapter in the history of anarchism and the Spanish

Revolution. They were more than just military or security units; they were tangible manifestations of a revolutionary ideology put into practice. They embodied the anarchist principle of self-organization, the commitment to collective defense, and the unwavering belief in the power of the people to shape their own destiny.

These committees were the grassroots embodiment of resistance, the everyday individuals who stepped up to defend their ideals when confronted with oppression and fascism. Their story is a testament to the ingenuity, courage, and organizational capacity of the anarcho-syndicalist movement. While the ultimate outcome of the Spanish Civil War was a devastating blow, the efforts of the CNT Defense Committees serve as a powerful reminder of the potent force of organized popular will and the enduring human desire for freedom and justice. Their preparedness, their swift action, and their unwavering dedication to the revolutionary cause in Barcelona are a crucial part of understanding this tumultuous period in Spanish history.

In essence, the CNT Defense Committees of Barcelona were "ready for revolution" not just in name, but in deed. They were the vigilant sentinels, the active participants, and the enduring symbols of a

movement that dared to dream of a world free from coercion and exploitation. Their legacy continues to resonate, offering valuable lessons about the importance of self-defense, decentralized organization, and the power of ordinary people to stand against overwhelming odds.

The Defiant Voice of Democracy: The CNT Defense Committees in Barcelona, 1933-1938

The CNT Defense Committees stand as a powerful testament to worker solidarity and revolutionary resilience in interwar Barcelona, emerging as pivotal actors in the turbulent socio-political landscape of Spain's Second Republic. Born from the radical labor union Confederación Nacional del Trabajo (CNT), these committees were not merely defensive bodies but dynamic institutions that channeled the aspirations of a working class determined to reshape society through direct action and collective organization. Their formation reflected both a response to escalating labor conflicts and a bold assertion of worker autonomy amid growing political instability.

Origins and Evolution (1933-1936)

The roots of the CNT Defense Committees trace back to the early 1930s, a period marked by failed reform attempts, economic hardship, and rising militancy among Barcelona's industrial workforce. As strikes intensified and state repression sharpened, these committees emerged as localized, grassroots structures designed to protect labor organizations, coordinate defense against employer aggression, and maintain order during volatile confrontations.

Operating within a framework of direct democracy, the committees empowered rank-and-file workers to take immediate control of critical infrastructure—factories, transport hubs, and supply lines—ensuring continuity in production and solidarity during strikes. Their rapid expansion reflected a deepening trust among workers in self-governance, transforming what began as emergency responses into enduring mechanisms of labor resistance.

Role and Impact in the Spanish Civil War (1936-1938)

With the outbreak of the Spanish Civil War in 1936, the CNT Defense Committees evolved from defensive

networks into active military and political forces. In Barcelona, a city central to the Republican struggle, these committees coordinated with anarchist militias and the CNT's broader structure, integrating civilian defense with revolutionary governance. They organized neighborhood patrols, managed food and supply distribution, and fortified key positions against Nationalist advances. Their presence was instrumental in sustaining the city's resistance during critical phases, embodying the CNT's vision of a society rooted in mutual aid and collective defense. Beyond logistics, they fostered a culture of participatory citizenship, challenging traditional hierarchies and embedding anarchist principles into the fabric of wartime governance.

Legacy and Enduring Influence

Though the war ended in defeat and the committees were dismantled by the Franco regime, their legacy endures as a powerful model of worker-led resistance and self-management. The CNT Defense Committees exemplified how labor organizations could transcend economic struggle to become pillars of social transformation. Their emphasis on direct action, horizontal decision-making, and community solidarity continues to inspire contemporary movements

advocating for economic justice and political empowerment. In Barcelona, their historical memory remains a source of inspiration, reminding activists that true revolution begins not only in ideology but in the daily practice of collective self-determination.

Future Outlook: Relevance in Modern Struggles

As global movements confront rising inequality, authoritarianism, and ecological crisis, the story of the CNT Defense Committees offers enduring lessons. Their success lay not only in military coordination but in building resilient, inclusive networks that empowered ordinary people to shape their destinies. In an era demanding new forms of solidarity and democratic engagement, revisiting their strategies reveals pathways toward sustainable resistance and transformative change. The spirit of Barcelona's CNT Defense Committees lives on—not as a relic of the past, but as a living blueprint for those who believe in revolution not as upheaval, but as the ongoing construction of a more just world.

Ready for Revolution: The CNT Defense Committees in Barcelona, 1933-1938

The vibrant, often tumultuous, streets of Barcelona in the years leading up to and during the Spanish Civil War (1936-1939) were a crucible of radical social and political experimentation. At the heart of this upheaval, particularly for the anarchist movement, were the **Confederación Nacional del Trabajo (CNT)** defense committees. These clandestine and then overt organizations, active between 1933 and 1938, represent a crucial, yet often under-examined, facet of revolutionary readiness and grassroots resistance. They were not merely reactive militias, but proactive instruments designed to protect the gains of the working class and prepare for the inevitable confrontation with a hostile state and its fascist allies. This article delves into the genesis, function, and ultimate significance of the CNT defense committees in Barcelona, exploring their role in shaping the revolutionary landscape of Catalonia.

The Seeds of Defense: Precursors to

the Committees

The CNT, as Spain's dominant anarcho-syndicalist labor federation, had a long history of confronting state repression and employer violence. From its inception, the organization understood that the pursuit of a stateless, classless society would inevitably be met with armed resistance from those who benefited from the existing power structures. Prior to the formalization of defense committees, various informal groups and individuals within the CNT acted as protectors of workers' meetings, strike lines, and revolutionary gatherings. These early manifestations of self-defense were essential in building a culture of resistance and solidarity. The experiences of earlier uprisings, such as the **Revolución de Asturias** (though centered elsewhere, its suppression sent shockwaves), underscored the need for organized and disciplined defense capabilities. The political climate of the Second Spanish Republic, established in 1931, while initially promising some liberties, also saw a resurgence of conservative forces and a willingness to use the state's power to suppress dissent. This environment fostered the growing conviction within the CNT that passive resistance would be insufficient.

The Rise of Formal Defense Committees: 1933 and Beyond

The year 1933 marked a significant turning point. It was during this period that the CNT began to more systematically organize its defense structures. The concept of "defense committees" – *comités de defensa* – emerged as a response to increasing political polarization and the perceived threat of a fascist coup. These committees were not solely military units; their primary purpose was multifaceted. They aimed to:

1. **Protect working-class organizations and activists:** This included safeguarding union headquarters, preventing provocations during strikes, and ensuring the safety of prominent CNT figures.
2. **Counter-mobilize against fascist and monarchist threats:** As right-wing groups gained traction, the committees were tasked with organizing counter-demonstrations and preparing for potential armed clashes.
3. **Disseminate revolutionary propaganda and ideology:** Defense committees often doubled as conduits for revolutionary education, ensuring that members understood the principles they were

defending and the goals they were striving towards.

4. Maintain internal discipline and coordination:

In a movement as decentralized as anarchism, these committees provided a crucial layer of organization and communication.

Barcelona, with its dense industrial working class and a strong CNT presence, became the natural epicenter for these defense committees. They were often composed of seasoned militants, former soldiers disillusioned with the republican army, and dedicated anarchists with a strong sense of duty. The committees operated with a degree of autonomy, but were also expected to align with the broader directives of the CNT's regional and national federations. The term "ready for revolution" was not hyperbole; it was a guiding principle. These committees were not just waiting for a revolution to happen; they were actively preparing the ground for it, anticipating the inevitable struggle.

Structure and Operations: Grassroots Militancy

The structure of the CNT defense committees was, by necessity, often clandestine and adaptable. At the

local level, committees would be formed within specific workplaces, neighborhoods, or syndicates (workplace unions). These local committees would then coordinate with broader district or city-wide bodies. Membership was voluntary but often demanded a high level of commitment. Training, though informal by conventional military standards, focused on practical skills: street fighting, basic firearms proficiency, and the use of improvised weaponry. Propaganda played a vital role, with committees distributing pamphlets, organizing clandestine meetings, and engaging in open-air rallies to galvanize support and recruit new members. The ethos was one of collective responsibility and self-reliance. The committees were designed to be a people's militia, rooted in the communities they served. This grassroots approach was both a strength and a potential weakness, as it could lead to fragmentation if not adequately coordinated. However, it also ensured deep popular legitimacy and a high degree of dedication among its members. The clandestine nature of their operations, particularly in the early years, was crucial for avoiding immediate repression from republican authorities who viewed such armed groups with suspicion.

The Committees in Action: From Strikes to Uprising

The period between 1933 and the outbreak of the Spanish Civil War in July 1936 was marked by a series of significant events where the CNT defense committees played a vital role. Major strikes, such as those in the port of Barcelona, often saw committee members acting as marshals, protecting picketers from police brutality and scabs. They were instrumental in organizing general strikes, not just as a means of economic pressure, but as a show of revolutionary strength and a way to test the state's response. The **Foc de la Farinera** (Fire of the Mill) incident in 1932, while predating the formal committees, was a precursor to the kind of confrontations they were designed to manage. The committees were also involved in the controversial **Jornadas de Octubre** (October Days) of 1934, an attempted general strike and revolutionary uprising that was brutally suppressed in many parts of Spain but saw significant CNT activity in Catalonia. While this uprising ultimately failed, it provided invaluable, albeit harsh, lessons about the need for better organization, coordination, and weaponry. The experience of 1934 undoubtedly reinforced the urgency of the defense committees' mission.

When the military coup began on July 18, 1936, the CNT defense committees in Barcelona were among the first to mobilize. They were not caught unprepared. Armed with their own weaponry, often acquired through clandestine means or pooled resources, they played a pivotal role in defeating the Nationalist uprising in the city. The image of anarchists, with their distinctive black and red armbands, fighting on the barricades is an enduring symbol of this period. The defense committees, alongside the newly formed anarchist militias, disarmed much of the military garrison and secured key strategic points. Their actions were instrumental in ensuring that Barcelona, and much of Catalonia, remained in the hands of the Republican government and the revolutionary forces. This was the ultimate test of their readiness, and in Barcelona, they largely succeeded, establishing a de facto anarchist revolution in the city.

The Post-Uprising Period: Revolution and Repression

Following the initial success of July 1936, the role of the defense committees shifted. With the revolution seemingly underway, their focus broadened from defense against an external threat to managing the

new revolutionary reality. This involved organizing the collectivized industries, maintaining order, and continuing to defend the revolution against internal and external enemies. The committees became integrated into the broader revolutionary apparatus, working alongside other anarchist organizations like the **Federación Anarquista Ibérica (FAI)** and the **Movimiento Ibérico de Liberación (MIL)**.

However, this period also saw increasing tensions. The republican government, though allied with the CNT, viewed the growing power of anarchist militias with suspicion. The Soviet-backed Communist Party (PCE) actively sought to undermine anarchist influence, leading to a power struggle that would ultimately cripple the Republican cause.

The notorious "**May Days**" of 1937 in Barcelona represent a tragic turning point. Internal conflicts, exacerbated by political maneuvering, erupted into street fighting between different factions of the Republican and anarchist forces. The CNT defense committees, now more formalized as part of the Workers' Patrols (*Patrullas de Control*) and later the Antifascist Workers' Militias, found themselves caught in the middle. The repression that followed, orchestrated by the PCE and the republican government, led to the dismantling of many of these

autonomous defense structures. Weapons were confiscated, and anarchist leaders were arrested or forced into hiding. The spirit of self-defense, so crucial in the early days of the revolution, was systematically eroded.

Legacy and Historiography: Understanding Revolutionary Agency

The CNT defense committees of Barcelona, active from 1933 to 1938, offer a compelling case study in revolutionary preparedness and grassroots agency. They embody the anarchist commitment to self-organization and direct action. Their story highlights the inherent challenges of building and sustaining a revolutionary movement in the face of determined opposition, both from established powers and rival political factions. While their ultimate goal of a stateless anarchist society was not achieved, their actions in defending the initial gains of the revolution and their contribution to repelling the Nationalist uprising in Barcelona are undeniable.

Historiographically, these committees have often been overshadowed by the more famous anarchist militias that emerged after July 1936. However, understanding the development and function of the

defense committees in the years *before* the war is crucial for grasping the depth of anarchist preparation and the organic nature of their revolutionary project. They represent a vital link between the theoretical ideals of anarchism and the practicalities of armed struggle. The study of these committees provides valuable insights into the complex interplay of ideology, organization, and action in periods of intense social upheaval. They serve as a potent reminder that revolutions are not spontaneous events but often the culmination of long-term planning, adaptation, and unwavering commitment to a vision of a different future. The story of the CNT defense committees is a testament to the enduring power of organized popular resistance when "ready for revolution."

Maintaining a dedicated library of Ready For Revolution The Cnt Defense Committees In Barcelona 1933 1938 allows users to revisit key concepts, track progress, and build cumulative knowledge. Digital libraries can grow significantly over time, so creating a structured system early prevents clutter and confusion. Regular backups are essential for long-term use.

Hardware failures, accidental deletion, or software issues can result in data loss if backups are not maintained. Storing copies of Ready For Revolution The Cnt Defense Committees In Barcelona 1933 1938 on cloud platforms, external drives, or multiple locations provides redundancy and peace of mind. Building a sustainable digital library

A sustainable library balances growth with maintenance. Periodically reviewing and pruning outdated or duplicate files keeps the collection relevant and manageable. Documenting changes, such as updates or replacements, further improves clarity and long-term usability.

Organizing Multiple Editions

Managing multiple editions of Ready For Revolution The Cnt Defense Committees In Barcelona 1933 1938 is a common challenge for long-term users, especially in academic or professional contexts where updates are frequent. Without clear organization, it becomes difficult to identify the correct version for reference or citation. Implementing a systematic approach ensures accuracy and consistency.

Labeling files with publication year, edition number, or volume information is a simple yet effective strategy. Including these details directly in file names allows quick identification and reduces the risk of using outdated material. For example, adding the year or edition to the filename distinguishes current files from archived ones at a glance.

Maintaining a catalog or index can further enhance organization. A simple spreadsheet or document listing titles, editions, publication dates, and storage locations provides an overview of the entire collection. This approach is particularly useful for large libraries or collaborative environments where multiple users access shared resources.

Version control practices also support organization. Keeping a change log that notes updates, revisions, or significant differences between editions helps users understand why multiple versions exist and when to use each. This clarity is essential for research accuracy and collaborative work.

Archiving and retrieval strategies

Older editions that are no longer actively used can be archived in separate folders. Archiving preserves historical context while keeping primary working directories uncluttered. Clear labeling and documentation ensure that archived files remain easy to retrieve when needed.
